l'architecture française du XI^{ème} au XVI^{ème} siècle). For the first time, the four most important essays have been collected and translated into English. These essays treat the history of French architecture, the principles of construction, the relationship between style and architecture, and the art of restoration. Not advancing a single unified thesis, Gupta (literature, Open U.) explores the meanings and uses of the rhetoric of "terror" and the "war on terror" in the wake of the September 11th attacks on the World Trade Center and the Pentagon. Specifically focusing on the framing effects of the Western mass media's treatment of the terms, he explores the extent to which the use of those terms and other political concepts

reflect facets revealed by careful political philosophizing. Unsurprisingly, he finds a wide divergence between media usage and possibilities revealed by political philosophy. A secondary ambition of Gupta's work, finished in November 2001, is to demonstrate how one should conduct political philosophizing as events are unfolding. Distributed by Stylus. This text offers an insight into the political challenges to free trade and US trade policy and explores the fragile ecosystem of multinational trade alliances in the face of insurgent political

protests from both the left and the right. It also takes a close look at WTO obstacles such as the failure of member countries to follow dispute settlement arrangements; conflict surrounding the imminent membership of China; and the mercurial administration of trade law in the US. The author presents a case for the incoherence of American trade policy but also analyzes the systematic problems involved in free trade and suggests solutions.

Under the regime of the World Trade Organization, local and regional policies are increasingly determined by global factors. One example is the New Partnership for Africa's Development. It stresses an earlier notion of African

Renaissance, which includes the emphasis on collective self-reliance, but at the same time seeks closer cooperation with the global trade system and its international agencies. Bi- and multilateral trade relations between external actors and individual African states or regional blocs are becoming ever more decisive. This is also true of the more recently negotiated Economic Partnership Agreements in the post-Lomé era of EU-African relations. In light of such trends the question of coherence between trade and other areas of development strategy and cooperation remains to be answered. The contributions to this Discussion Paper reflect upon related matters of socio-economically viable strategies seeking to reconcile the global

and the regional in an African perspective. They were originally presented to the Panel Regional Cooperation in Sub-Saharan Africa: Between Collective Self-Reliance and Global Trade Regimes organized by the Nordic Africa Institute within the 11th General Conference of the European Association of Development Research and Training Institutes in September 2005 in Bonn. This publication is useful for economists, political scientists, policy makers and other professionals dealing with Africa in development assistance and in trade.

The Dictionary of International Trade Law book was the first of its kind and remains the indispensable reference that students, scholars, and practitioners around the world frequently consult. This Dictionary defines and explains in detail hundreds of terms -- common and uncommon ones -- used in the field, from the "ACU" and "CMAA" to "TIFA" and the

"WCO.". Many entries include organizational charts (e.g., the structure of the new Department of Homeland Security) and tables (e.g., of precedent-setting cases on zeroing). Many entries also provide references for further research. Notably, the Dictionary has two Annexes: • Annex A has data on U.S. FTAs, including votes by political party in Congress, on immediate versus deferred duty-free treatment for goods, market access for services, and government procurement thresholds. It also boasts a Note on TPP, which is rich in breadth and depth. • Annex B sets out research tools, such as tables on milestones in Chinese history (from early dynasties through modern legal reforms), EU institutions, and U.S. trade statutes. Like the globally acclaimed book, *International Trade Law:*
