The Unpredictability of Gameplay explores the many forms of unpredictability in games and proposes a comprehensive theoretical framework for understanding and categorizing non-deterministic game mechanics. Rather than viewing all game mechanics with unpredictable outcomes as a single concept, Mark R. Johnson develops a three-part typology for such mechanics, distinguishing between randomness, chance, and luck in gameplay, assessing games that range from grand strategy and MMORPGs to slot machines and card games. He also explores forms of unanticipated unpredictability, where elements of games fail to function as intended and create new forms of gameplay in the process. Covering a range of game concepts using these frameworks, The Unpredictability of Gameplay then explores three illustrative case studies: 1) procedural generation, 2) replay value and grinding, and 3) player-made practices designed to reduce the level of luck in non-deterministic games. Throughout, Johnson demonstrates the importance of looking more deeply at unpredictability in games and game design and the various ways in which unpredictability manifests while offering an invaluable tool for game scholars and game designers seeking to integrate unpredictability into their work.

Jared Fogel was, is, and will continue to be America's weight loss

icon. As an obese college student in Indiana he lost 245 pounds on a self-devised diet of Subway sandwiches. Since 2000, he has appeared thousands of times on national television as the spokesperson for Subway's Eat healthy Platform; and he's slated to continue in this role indefinitely. In fact, Subway worried that he might be getting overexposed and decided to discontinue him. Sales fell off. Jared was quickly rehired. But to keep him from being overexposed, Subway's program runs Jared for six or eight weeks every three months. His book is not so much a diet book (his diet was pretty simple to grasp - eat Subway sandwiches) but it's more a motivational, self-help book which offers hope to people who want to change their lives. Jared has also appeared on Oprah, Larry King Live, the Today Show, Good Morning America, the Jane Pauly Show and has made hundreds of speaking appearances and public appearances at sports and civic events. The Billboard is about a fictional Black women's clinic in Chicago's Englewood neighborhood on the South Side and its fight with a local gadfly running for City Council who puts up a provocative billboard: "Abortion is genocide. The most dangerous place for a Black child is his mother's womb," spurring on the clinic to fight back with their own provocative sign: "Black women take care of their families by taking care of themselves. Abortion is self-care. #Trust Black Women." The book also has a foreword and afterword and Q&A with a founder of reproductive justice. As a play and book, The Billboard is a cultural force that treats abortion as more than pro-life or pro-choice.

Ornamentalism offers one of the first sustained and original theories of Asiatic femininity. Examining ornamentality, in lieu of Orientalism, as a way to understand the representation, circulation, and ontology of Asiatic femininity, this study extends our vocabulary about the woman of color beyond the usual platitudes about objectification. By offering us a conceptual frame through which to focus on race without being solely beholden to flesh or skin, this study alters the foundational terms of feminism and places Asian femininity at the center of an entire epistemology of race. By tracing a direct link between the making of artificial Asiatic femininity and a seemingly much more technological history of synthetic personhood in the West from the nineteenth to the twenty-first century, Ornamentalism shows how the construction of modern personhood in the multiple realms of law, culture, and art has been surprisingly indebted to this very marginal figure. Drawing from and speaking to the multiple fields of feminism, critical race theory, visual culture, performance studies, legal studies, Modernism, Orientalism, Object Studies and New Materialism, Ornamentalism will leave reader with a greater understanding of what it is to be in Americanculture.

The Struggle of Non-Sovereign Caribbean Territories is an essay collection made up of two sections; in the first, a group of anglophone and francophone scholars examines the roots, effects and implications of the major social upheaval that shook Guadeloupe, Martinique, French Guiana, and Réunion in February and March of 2009. They clearly demonstrate the critical role played by community activism, art and media to combat politico-economic policies that generate (un)employment, labor exploitation, and unattended health risks, all made secondary to the supremacy of profit. In the second section, additional scholars provide in-depth analyses of the ways in which an insistence on capital accumulation and centralization instantiated broad hierarchies of market-driven profit, capital accumulation, and economic exploitation upon a range of populations and territories in the wider non-sovereign and nominally sovereign Caribbean

from Haiti to the Dutch Antilles to Puerto Rico, reinforcing the racialized patterns of socioeconomic exclusion and privatization long imposed by France on its former colonial territories.

The Digital Dialectic is an interdisciplinary jam session about our visual and intellectual cultures as the computer recodes technologies, media, and art forms. Unlike purely academic texts on new media, the book includes contributions by scholars, artists, and entrepreneurs, who combine theoretical investigations with hands-on analysis of the possibilities (and limitations) of new technology. The key concept is the digital dialectic: a method to ground the insights of theory in the constraints of practice. The essays move beyond journalistic reportage and hype into serious but accessible discussion of new technologies, new media, and new cultural forms.
