**Faulkner, Film, and the Popular Imagination** SUNY Press

Reflects philosophy of Model Curriculum Guide for the English-Language Arts (K-8).

*Personal Observation with the Army and Navy, from the First Battle of Bull Run to the Fall of Richmond* Springer

Academic literacy - prepare to learn is different from traditional courses in that it is task-based: it requires of language learners who are developing their academic literacy to do authentic academic tasks and to solve real academic problems.

*Criminal Bodies and the Gallows in Popular Medicine* Springer Science & Business Media

This comprehensive manual offers direction for every step of the thesis or dissertation process, from choosing an appropriate topic to adapting the finished work for publication.

*Developmental Education* House of Stratus

The history of Guarani is a history of resilience. Paraguayan Guarani is a vibrant, modern language, mother tongue to millions of people in South America. It is the only indigenous language in the Americas spoken by a non-ethnically-indigenous majority, and since 1992, it is also an official language of Paraguay alongside Spanish. This book provides the first comprehensive reference grammar of Modern Paraguayan Guarani written for an English-language audience. It is an accessible yet thorough and carefully substantiated description of the language's phonology, morphosyntax, and semantics. It also includes information about its centuries of documented history and its current sociolinguistic situation.

*Neuro-Education and Neuro-Rehabilitation* Springer

NEW YORK TIMES BESTSELLER • The classic work that predicted the anxieties of a world upended by rapidly emerging technologies—and now provides a road map to solving many of our most pressing crises. “Explosive . . . brilliantly formulated.” —The Wall Street Journal Future Shock is the classic that changed our view of tomorrow. Its startling insights into accelerating change led a president to ask his advisers for a special report, inspired composers to write symphonies and rock music, gave a powerful new concept to social science, and added a phrase to our language. Published in over fifty countries, Future Shock is the most important study of change and adaptation in our time. In many ways, Future Shock is about the present. It is about what is happening today to people and groups who are overwhelmed by change. Change affects our products, communities, organizations—even our patterns of friendship and love. But Future Shock also illuminates the world of tomorrow by exploding countless clichés about today. It vividly describes the emerging global civilization: the rise of new businesses, subcultures, lifestyles, and human relationships—all of them temporary. Future Shock will intrigue, provoke, frighten, encourage, and, above all, change everyone who reads it.

*The Boys of '61, Or, Four Years of Fighting* Bantam

"Tiger-Lilies is actually a somewhat autobiographical book. In it, Lanier analyzes the relationship between a Northerner and a Southerner throughout the Civil War. As a Southerner who had fought for the Confederate army, Lanier had experienced the war firsthand, both on the battlefield and as a prisoner of war. These experiences are recognizable in the battle scenes especially, which are considered some of the most realistic representations of Civil War combat in literature. Ultimately, Tiger-Lilies can be interpreted as an anti-war novel and one of Lanier's less successful endeavors in the course of his career."--The History Engine.

*Milo* Springer Science & Business Media

Arguing that traditional, test-based evaluation has a negative effect on many students, this book describes new methods of assessing student performance.

*Infective Endocarditis* JHU Press

Healthy Living from the Start is a comprehensive health curriculum that provides the framework

for teaching children about health and well-being. Designed to be used throughout the early grades, this book has a flexible format that allows you to customize your health program for use with multiple grades or in a sequential manner from kindergarten through third grade.

**Archeology of Mississippi** Corwin Press

Once upon a time a brave knight rescued a young man. Unfortunately, he then spent the next few years bossing the young man around and treating him like a child.Milo has been burying himself at Chi an Mor, hiding from the wreckage of his once promising career and running from a bad relationship that destroyed what little confidence he had. Niall, his big brother's best friend, has been there for him that entire time. An arrogant and funny man, Niall couldn't be any more different from the shy and occasionally stuttering Milo, which has never stopped Milo from crushing wildly on the man who saved him.However, just as Milo makes the decision to move on from his hopeless crush, he and Niall are thrown into close contact, and for the first time ever Niall seems to be returning his interest. But it can never work. How can it when Milo always needs rescuing?From the bestselling author of the Mixed Messages series comes a story about a man who needs to write his own happily ever after.This is the second book in the Finding Home series, but it can be read as a standalone.Content warning: There are descriptions of domestic abuse in this book.

*Reform in School Mathematics and Authentic Assessment* Frontiers Media SA

Over the years a number of excellent books have classified and detailed drug drug interactions into their respective categories, e.g. interactions at plasma protein binding sites; those altering intestinal absorption or bioavailability; those involving hepatic metabolising enzymes; those involving competition or antagonism for receptor sites, and drug interactions modifying excretory mechanisms. Such books have presented extensive tables of interactions and their management. Although of considerable value to clinicians, such publica tions have not, however, been so expressive about the individual mechanisms that underlie these interactions. It is within this sphere of "mechanisms" that this present volume specialises. It deals with mechanisms of in vitro and in vivo, drug-drug, drug food and drug-herbals interactions and those that cause drugs to interfere with diagnostic laboratory tests. We believe that an explanation of the mechanisms of such interactions will enable practitioners to understand more fully the nature of the interactions and thus enable them to manage better their clinical outcome. If mechanisms of interactions are better understood, then it may be pos sible for the researcher to develop meaningful animal/biochemical/tissue cul ture or physicochemical models to which new molecules could be exposed during their development stages. The present position, which largely relies on patients experiencing adverse interactions before they can be established or documented, can hardly be regarded as satisfactory. This present volume is classified into two major parts; firstly, pharmacokinetic drug interactions and, secondly, pharmacodynamic drug interactions.

*Executing Magic in the Modern Era* London : P. Owen

In the last decade, important discoveries have been made in cognitive neuroscience regarding brain plasticity and learning such as the mirror neurons system and the anatomo-functional organization of perceptual, cognitive and motor abilities.... Time has come to consider the societal impact of these findings. The aim of this Research Topic of Frontiers in Psychology is to concentrate on two domains: neuro-education and neuro-rehabilitation. At the interface between neuroscience, psychology and education, neuro-education is a new inter-disciplinary emerging field that aims at developing new education programs based on results from cognitive neuroscience and psychology. For instance, brain-based learning methods are flourishing but few have been rigorously tested using well-controlled procedures. Authors of this Research Topic will present their latest findings in this domain using rigorously controlled experiments. Neuro-rehabilitation aims at developing new rehabilitation methods for children and adults with learning disorders. Neuro-rehabilitation programs can be based upon a relatively low number of patients and controls or on large clinical trials to test for the efficiency of new treatments. These projects may also aim at testing the efficiency of video-games and of new methods such as Trans Magnetic

Stimulation (TMS) for therapeutic interventions in children or adolescents with learning disabilities. This Research Topic will bring together neuroscientists interested in brain plasticity and the effects of training, psychologists working with adults as well as with normally developing children and children with learning disabilities as well as education researchers directly confronted with the efficiency of education programs. The goal for each author is to describe the state of the art in his/her specific research domain and to illustrate how her/his research findings can impact education in the classroom or rehabilitation of children and adolescents with learning disorders.

**Preventing Problem Behaviors** Harvard University Press

Through photographs and thoughtful text, this volume looks at the Depression and some of the families it affected.

**What Happens in Vegas Stays on YouTube** Dual Language Education of New Mexico

This book is open access under a CC BY 4.0 license This book explores the magical and medical history of executions from the eighteenth to the early twentieth century by looking at the afterlife potency of criminal corpses, the healing activities of the executioner, and the magic of the gallows site. The use of corpses in medicine and magic has been recorded back into antiquity. The lacerated bodies of Roman gladiators were used as a source of curative blood, for instance. In early modern Europe, a great trade opened up in ancient Egyptian mummies and the fat of executed criminals, plundered as medicinal cure-alls. However, this is the first book to consider the demand for the blood of the executed, the desire for human fat, the resort to the hanged man's hand, and the trade in hanging rope in the modern era. It ends by look at the spiritual afterlife of dead criminals.

*Standards-Based and Responsive Evaluation* Hippocrene Books

Offering innovative readings of these canonical works, this study sheds new light on Faulkner's uniquely American modernism.

**Unequal Freedom** SAGE Publications

This reference resource represents the consensus opinion of a team of international specialists on the diagnosis and treatment of infective endocarditis (IE), many of whom have been co-authors of American or European guidelines on the topic. It is therefore a useful tool for many practitioners: cardiologists and cardiac imagers, cardiac surgeons, echocardiographers, specialists of internal medicine, neurologists, and infectiologists. Infective endocarditis (IE) is defined as an infection of the endocardial surface of the heart, which may include one or more heart valves, the mural endocardium, or a septal defect. Its intracardiac effects include severe valvular insufficiency, which may lead to intractable congestive heart failure and myocardial abscesses. If left untreated, IE is generally fatal. IE is a changing disease with new diagnostic techniques, new therapeutic strategies, more frequent elderly people and patients with prosthetic valves of intravenous drug users.

**Academic Literacy** Springer Nature

As we begin the twenty-first century, technological, economic, political, and social forces have created a new era. Technological advancements and lower trade barriers have paved the way for the globalization of markets, bringing intense competition to the U.S. economy. Political systems and movements around the world are having a profound impact on our national security, as well as on our human security. The increasing diversity of our workplaces, schools, and communities is changing the face of our society. To confront the twenty-first century challenges to our economy and national security, our education system must be strengthened to increase the foreign language skills and cultural awareness of our students. America's continued global leadership will depend on our students' abilities to interact with the world community both inside and outside our borders. In this executive summary, the Committee for Economic Development recommends that (1) international content should be taught across the curriculum and at all levels of learning, to

expand American students' knowledge of other countries and cultures; (2) expand the training pipeline at every level of education to address the paucity of Americans fluent in foreign languages, especially critical, less commonly taught languages; and (3) national leaders--political leaders, as well as the business and philanthropic communities, and the media--should inform the public about the importance of improving education in foreign languages and international studies. [For the full report, see ED502294.].

[A Guide to Assessment and Treatment](#) Digital Citizenship in Schools, Second Edition

As existing buildings age, nearly half of all construction activity in Britain is related to maintenance, refurbishment and conversions. Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry. Given its importance

to sustainable construction, the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future, especially in the developed parts of the world. Building Adaptation, Second Edition is intended as a primer on the physical changes that can affect older properties. It demonstrates the general principles, techniques, and processes needed when existing buildings must undergo alteration, conversion, extension, improvement, or refurbishment. The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work. The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses. This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation

of buildings. It deals with any work to a building over and above maintenance to change its capacity, function or performance.

*Liberator of Kansas, and Martyr of Virginia* Springer Nature

Coffin writes his personal observations while with the United States Army and Navy during the Civil War. From the first battle of Bull Run to the fall of Richmond and the surrender of Lee, he experienced the war at close quarters and takes us through the intimacy of the march and the camp, among ordinary men and officers, as momentous events unfolded and important decisions were made.

**Let Us Now Praise Famous Men** Routledge

A compilation of 3M voices, memories, facts and experiences from the company's first 100 years.
