This comparative dictionary provides a
bottom-up reconstruction of the Rote-Meto
languages of western Timor. Rote-Meto is
one low-level Austronesian subgroup of
eastern Indonesia/Timor-Leste. It contains
1,174 reconstructions to Proto-Rote-Meto
(or a lower node) with supporting evidence
from the modern Rote-Meto languages.
These reconstructions are accompanied by
information on how they relate to forms in
other languages including
Proto-Malayo-Polynesian etyma (where
known) and/or out-comparisons to
putative cognates in other languages of
the region. The dictionary also contains
two finder-lists: English to Rote-Meto, and
Austronesian reconstructions with Rote-
Meto reflexes. The dictionary is preceded

by three introductory chapters. The first
chapter contains a guide to using the
dictionary as well as discussion of the data
sources. The second chapter provides a
short synchronic overview of the Rote-
Meto langauges. The third chapter
discusses the historical background of
Rote-Meto. This includes sound
correspondences, the internal subgrouping
of the Rote-Meto family, and the position
of Rote-Meto within Malayo-Polynesian
more broadly. Searchable electronic
versions of the comparative dictionary are
provided in two formats at
<http://hdl.handle.net/1885/251618>. The
first electronic version is a Lexique Pro
export of the dictionary. The Lexique Pro
file contains the same data and
information in the book version of the
dictionary, but does not contain the
introductory chapters. See the "About
Rote-Meto" tab of the Lexique Pro file for
more information on this version of the
dictionary. The second electronic version
is a text file. It is formatted as a tab
separated file and is intended to be read
in spreadsheet format. This text file does
not contain all the data and information in
other versions of the Rote-Meto
Comparative Dictionary and should be
used in conjunction with these other
versions. See the associated readme for
more information on what data is included
and excluded from that text file.

This landmark dictionary serves as a basis
for historical-comparative research on
Tibetan. Conceptualized empirically and
etymologically, it builds on extensive data
from the Tibetan dialects and establishes
the relationship to Written Tibetan. It
reflects historical sound change and
semantic change in all of linguistic Tibet.
Based on historical sound change and
geographical distribution, the dictionary
applies a new classification of the Tibetan
dialects.

Historical and comparative linguistics has
been a major scholarly discipline for 200
years, and yet this is the first dictionary
ever devoted to it. With nearly 2400
entries, this dictionary covers every aspect
of the subject, from the most venerable
work to the exciting advances of the last
few years, many of which have not even
made it into textbooks yet.All of the
traditional terms are here, but so are the
terms only introduced recently, in
connection with such varied subjects as
pidgin and creole languages, the
sociolinguistic study of language change,
mathematical and computational methods,
the novel approaches to linguistic
geography, the controversial proposals of
new and vast language families, and the
attempts at relating the results of the
historical linguists to those of the
archaeologists, the anthropologists and
the geneticists.More than just a dictionary,
this book provides genuine linguistic
examples of most of the terms entered,
detailed explanations of fundamental
concepts, critical assessment of
controversial ideas, cross-references to
related terms, and an abundance of
references to the original
literature.Features:*The first dictionary in
the field.*Comprehensive

coverage.*Clearly written and accurate entries.*Covers traditional and contemporary terminology.*Provides linguistic examples of terms defined.*Supplies numerous cross-references to related terms.*Includes hundreds of references to the original literature.
