*School Didactics And Learning* Ballantine Books

A replacement of the author's well-known book on Translation Theory, *In Search of a Theory of Translation* (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on. Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour □ in the appropriate cultural setup; textual components □ in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice? This is an excellent book for higher-level translation courses.

Most books are to be read, some are to be studied, but a few are meant to be lived in for a short time. *Merlin's Star* is of this last kind. A story that begins with Merlin, the wise and powerful wizard of Camelot. Trickery and the ultimate betrayal of another causes Merlin to divide a magical star among a chosen five, each pledging to use the power to bring joy and happiness to the children of the world. But all is not as it seems...and centuries later when the stars are stolen, disaster looms for Santa Claus, the Tooth Fairy, the Sandman and the last of the great sorcerers. Their fate rests with two of

Santa's elves, Alfred and Henry, joining with two Haole to search for, and return the stars before it's too late. A journey that will lead them to Bitter Realm, and a final encounter with the wizard known only as Churilar.

### Teaching English to Young Learners

John Benjamins Publishing

Why do people study religion? How have they studied it in the past? How do we study religion today? Is the academic study of religion the same as religious education? These and many other questions are addressed in this engaging introduction to the discipline of religious studies, written by two experienced university teachers. The authors have crafted this book to familiarize novice students with key concepts and terminology in the study of religion. More advanced students will find a varied array of theoretical perspectives and methodological approaches to the field. Topics include: definitions of religion perspectives in the study and teaching of religion how religion began to be studied: traditional perspectives - philosophical and theological how people experience religion: perspectives in the study of religious consciousness and perception - phenomenological and psychological studying religion within communities: Social and cultural perspectives - anthropological, sociological, political and economic judging religion: critical perspectives -feminist approaches, the interaction of popular literature and religion contextual perspectives - historical and comparative. The book encourages students to think critically about the theories and methods presented. Students will find arguments for the strengths and limitations of these approaches, understand connections among religious studies and other intellectual movements, and develop their own ideas of how they might want to go about the study of religion. Summary boxes, a timeline, a glossary and other pedagogic aids help students grasp key concepts, along with a companion website at [www.sastor.com](http://www.sastor.com).

### The Grammar of Case AMACOM

"A very special story about life and love and courage." MERLIN OLSEN, SPORTSCASTER John Harding had a high-powered career, a loving wife, and a beautiful son. He's lost it all and has returned to his home town of Boland, New Hampshire, teetering on the brink of suicide. But an old friend asks John to manage his old Little League team, the Angels. Reluctantly, he agrees, and meets a hopeless player who bears a striking resemblance to his dead son--and through their extraordinary relationship, John finds the wisdom in living that he thought had slipped beyond his grasp forever.... AN ALTERNATE SELECTION OF THE LITERARY GUILD

**Language and Gender** Springer Science & Business Media

With over three decades of experience in public sector HR, Bob Lavigna gives managers the tools they need to leverage the talents of government's most important resource: its people. You know firsthand that your government workers are not underworked, overpaid, or mindless clones just carrying out the morally compromised work that politicians forced through the pipeline. Besides having to daily overcome the persona of being a government employee, your hard-working employees face enormous pressures and challenges every day and are asked to solve some of our country's toughest problems, including unemployment, security, poverty, and education. To be able to return to their desks daily with the passion and commitment required to accomplish these overwhelming duties will require a manager who knows how to leverage talent, improve performance, and inspire passion within these true servants. In *Engaging Government Employees*, you will learn: Why a highly engaged staff is 20 percent more productive How to get employees to deliver "discretionary effort" How to assess the level of engagement Why free pizza and Coke every Friday is not a viable strategy *Engaging Government Employees* rejects the typical one-size-fits-all approach to motivation. Drawing on a wealth of empirical

evidence, this indispensable resource shows how America's largest employer can apply the science of engagement to get team members passionate about the agency's mission and committed to its success.

Using a recent IMF survey and expanding on previous studies, we document the use of macroprudential policies for 119 countries over the 2000-13 period, covering many instruments. Emerging economies use macroprudential policies most frequently, especially foreign exchange related ones, while advanced countries use borrower-based policies more. Usage is generally associated with lower growth in credit, notably in household credit. Effects are less in financially more developed and open economies, however, and usage comes with greater cross-border borrowing, suggesting some avoidance. And while macroprudential policies can help manage financial cycles, they work less well in busts.

Instead of robbing a bank, Dortmund tries to steal the whole building Encyclopedias are heavy, and John Dortmund is sick of carrying them. While in between jobs, the persistent heist-planner is working an encyclopedia-selling scam that's about to blow up in his face. The cops are on their way when his friend Kelp pulls up in a stolen Oldsmobile, offering a quick escape from the law and a job that's too insane to turn down. Kelp's nephew is an FBI washout who's addicted to old-time pulp novels and adventure stories. He tried being a cop, and now he wants to be a robber. His target: a Main Street bank that has temporarily relocated to a large mobile home. Breaking in is impossible—there are seven guards and a police station down the street—but mobile homes were meant to be driven. Dortmund just has to drive the bank away.

*The Language Teaching Controversy*

Addison Wesley Publishing Company

In this book a new theory on instruction is presented - a reflective theory of school didactics - uniquely incorporating continental German and Nordic research traditions in the theory of didactics (Didaktik), together with Anglo-American research on teaching (instructional research) and cognitivist theory. School didactics is defined as a field of research within general education. This field is limited to research and theory aiming at understanding the pedagogical practice which takes place in institutionalized educational settings guided by a curriculum collectively agreed upon. As the theory is designed to be valid for institutionalized education framed by a politically accepted curriculum, it is a culturally seen regional theory of education, not a universal one. According to this school theory the fundamental features of an institutionalized pedagogical process consist in the intentional, interactional, teaching-studying-learning process that is culturally and historically developed and situated. However, the present model does not explicitly formulate goals nor the means of educational practice. Rather, the model emphasizes the teacher and student as reflective and intentional subjects where the teacher is acting as the representative

of the collective but also as the learners' advocate. Because of this the theory presented is not a normative or prescriptive theory, instead it is a reflective theory.

### The Use and Effectiveness of Macroprudential Policies: New Evidence

Walter de Gruyter

Water is vital for life. Since the dawn of civilization, much effort has been made to harness sources of fresh water. Recent years have raised global awareness of the need for increasing demand of water worldwide, largely because of growing population, rising standard of living, higher demand for energy, and greater appreciation for environmental quality. As an example, the world population has increased threefold in the past five decades. In order to meet the rising water demand, water resources are being developed by building large dams, reservoirs, barrages and weirs across rivers worldwide. The guiding principle for water resources development has been to ensure adequate supply of water for agriculture, domestic use (including fine drinking water), waste disposal, industries, and energy production, with due attention to maintain the ecosystem functions. This development, however, depends on a holistic, cooperative and scientific approach. The basic inputs in the assessment of water resources for a given region are from hydrological data and the subject of hydrology forms the core in achieving sustainable development of water resources. Barring a few exceptions, hydrological data for most river basins are sparse and therefore it is difficult to comprehensively assess their water resources. The major source of water is rainfall which occurs as a result of condensation of atmospheric moisture governed by the science of meteorology. *Bank Shot* John Wiley & Sons

The Longman Keys to Language Teaching series is intended especially for ordinary teachers. The books in the "Keys" series offer realistic, practical, down-to-earth advice on useful techniques and approaches in the modern ELT classroom. Most of the activities suggested in these books can be adapted and used for almost any class, by any teacher. One of the subjects of most concern to all teachers is classroom testing. For what reasons should we do it? How should we do it? How often should we do it? How should we organise it? Can it be harmful? What is the relationship between teaching and testing? These are just some of the questions that Brian Heaton addresses in this book. With a minimum of jargon, a number of fundamental concepts are

treated in an accessible manner. As well as a discussion of these important issues, the author includes a great many examples of tests that teachers can adapt and use in their own classrooms. In addition, he gives advice on the role of continuous assessment, in which there has been an increasing amount of interest in recent years. The book also contains some suggestions on oral testing - including how to cope with this in large classes.

Agricultural English is a collection of essays on the English of Agriculture. The approach is a linguistic one: the different aspects of the English used in the field of agriculture (agricultural practices, agricultural systems) and in some fields related to agriculture (agricultural zoology, agri-tourism, biology, botany, ecology, entomology, gastronomy, land measurement, plant pathology, zoology) are analysed from a morphological (combination, derivation), syntactical (nominal phrases, verbal phrases), lexical and lexicographical, semantic (homonymy, semantic fields, synonymy, terminology), pragmatic (academic discourse, idiom, metaphor), etymological (etymon, Latin heritage), and contrastive (English-Croatian, English-French, English-German, English-Romanian, Romanian-English) points of view. The book will appeal to agriculturists, animal breeders, professors, researchers,

students, and translators from Croatian-, English-, French-, German-, and Romanian-speaking countries, active in their own countries or abroad. The types of academic readership it would appeal to include academic teaching staff, researchers and students in the fields of agriculture and related fields - agricultural zoology, agri-tourism, biology, botany, ecology, entomology, gastronomy, land measurement, plant pathology, and zoology.

A study of the different roles which nouns play in the event or state expressed by the verb or adjective with which they are associated. The book explores within the framework of transformational-generative grammar the 'localist hypothesis', which asserts that all the roles for nouns involve basically the notions of location and direction.

This book develops the dual themes that languages can differ widely in their vocabularies, and are also sensitive indices to the cultures to which they belong. Wierzbicka seeks to demonstrate that every language has "key concepts," expressed in "key words," which reflect the core values of a given culture. She shows that cultures can be revealingly studied, compared, and explained to outsiders through their key concepts, and that the analytical framework necessary for this purpose is provided by the "natural semantic metalanguage," based on lexical universals, that the author and colleagues have developed on the basis of wide-ranging cross-linguistic investigations. Appealing to anthropologists, psychologists, and philosophers as well as linguists, this book demonstrates that cultural patterns can be studied in a verifiable, rigorous, and non-speculative way, on the basis of empirical evidence and in a coherent theoretical framework.
