The Lahu are a hill-dwelling Tibeto-Burman people whose language reflects the influence of Thai and Chinese, yet retains a unique beauty and expressive power of its own. The Dictionary of Lahu is one of the most exhaustive and sophisticated dictionaries yet produced for a Southeast Asian language. Together with the author's *The Grammar of Lahu* (UCPL vol. 75, 1973/1982), it places Lahu among the best documented minority languages of the world.

An assassination attempt on General Eisenhower looms as agents race to take down a Nazi terrorist organization in this "undeniably exciting" thriller (The Washington Post). Written by an author with personal experience as a counterintelligence agent during World War II, *Order of Battle* is set during the waning days of Nazi Germany, as plans are hatched for a covert terrorist organization known as the Werewolves, meant to carry on Hitler's legacy even in the face of defeat. High on their list of goals: the death of America's heroic Dwight D. Eisenhower. But the secret Nazi resistance will have trouble eluding the Allied forces lying in wait for them—especially one dedicated American intelligence officer who suspects that danger lurks underground amid the chaos of a collapsing empire—in this novel inspired by real events and filled with "maximum tension" (The New York Times).

This dictionary provides a valency description of English verbs, nouns and adjectives. Each entry contains a comprehensive list of the complementation patterns identified on the basis of the largest

corpus of English available at the present time. All examples are taken directly from the COBUILD/Birmingham corpus. The valency description comprises statements about the quantitative valency of the lexical units established, an inventory of their obligatory, contextually optional and purely optional complements as well as systematic information on the semantic and collocational properties of the complements. An outline of the model of valency theory used in this dictionary is provided in the introduction.

Ernest Hemingway was an American novelist, short-story writer, journalist, and sportsman. His economical and understated style—which he termed the iceberg theory—had a strong influence on 20th-century fiction, while his adventurous lifestyle and his public image brought him admiration from later generations. Hemingway's writing includes themes of love, war, travel, wilderness, and loss. Hemingway often wrote about Americans abroad. He was awarded the 1954 Nobel Prize in Literature for "his mastery of the art of narrative, most recently demonstrated in *The Old Man and the Sea*, and for the influence that he has exerted on contemporary style. Only after the Nazis invaded Poland and France did the United States Government authorize mass production of tanks. By the end of the War American industry had built nearly 90,000 tanks, more than Germany and Great Britain combined. The first big order in May 1940 was for 365 M2A4 light tanks, the initial iteration of the Stuart series, with almost 24,000 constructed. The Stuart series was supplemented by almost 5,000 units of the M24 Chaffee light tank. There was also the failed M22 Locust light tank intended for airborne operations. The M4 series of medium tanks, best known as the Sherman, were the most numerous with some 50,000 in service with not only the American military but British and other Allied armies. It was not until later in the war that the M26 Pershing heavy tank was built. Initially the US Army doctrine saw tanks as primarily for the exploitation role. Later the concept of tank destroyers evolved to counter large scale German armored offensives. These defensive AFVs included the half-track-based 75mm Gun Motor Carriage M3 and the full-tracked M10, M18, and M36. This comprehensive and superbly illustrated book describes in authoritative detail the characteristics and contribution to victory of these formidable fighting vehicles.

This book provides a timely analysis of the use of cultural narratives and narratives of credibility in rape trials in England and Wales, drawing on court observation methods. It draws on data from rape and sexual assault trials in 2019 which is used to examine the current status of newly emerging issues such as the use of digital evidence and the impacts of increasing policy attention on rape trials. Drawing on the concept of master narratives, the book provides an examination of rape myths and broader cultural narratives focussing on the intersections of gender and class and it also touches on the intersections of age, (dis)ability and mental health. It emphasizes the importance of situating rape myth debates and sexual violence research within a broader cultural context and thus argues for widening the lens with which rape myths in the courtroom, as well as in the wider criminal justice system, are viewed in research and contemporary debates. The findings presented in this book will help further discussion at a critical time by enabling scholars, as well as practitioners and policymakers, to better understand the current mechanisms that serve to undermine and retraumatise victim-survivors in the courtroom. It seeks to inform further research as well as positive changes to policy and practice.--

Queers, Whores, and Junkies Respond to AIDS Simon and Schuster

From around the 1950s to the mid-1980s, if you wanted to join the Police before the age of 18/19, it was possible to become a Police Cadet from 16 onward. It didn't give you any police powers but did

provide you with a good insight into 'the job'. You got the uniform and went out on patrol with regular officers and undertook attachments to every section within the force to see how each one worked. But prior to all the excitement came 12 months of 'character building' at a residential establishment called Cadet Training School. This book looks back at those days within Hampshire and to a time where self-discipline and physical fitness were key to that character building. Today it might be classed as institutional bullying, but most of us loved it.....except for the morning run, the constant uniform inspections, the walks across Dartmoor, punishment press-ups, bulling boots, the food, the blisters and making bed packs.

This is the most comprehensive self-contained treatment of Middle High German available in English. It covers the language, literature, history, and culture of German in the period from 1050 to 1350 and is designed for entry-level readers, advanced study, teaching, and reference. The book includes a large sample of texts, not only from Classical works such as Erec, the Nibelungenlied, Parzival, and Tristan, but also from mystical writing, chronicles, and legal documents. The selection represents all major dialects and the full time span of the period. The introduction defines Middle High German linguistically, geographically, and chronologically. Chapter 2 then provides a detailed exploration of the grammar, covering sounds and spelling, inflectional morphology, syntax, and lexis. Chapter 3 deals with versification, discussing metre, rhyme, lines of verse in context, and verse forms, and includes practical tips for scansion. Chapter 4 offers an account of the political and social structures of Medieval Germany and a survey of the principal types of texts that originated in the period. The final chapter of the book comprises over forty texts, each placed in context and provided with explanatory footnotes. The first two texts, to be taken together with the introductory grammar sections, are aimed at newcomers. A glossary provides full coverage of the vocabulary appearing in the texts and throughout the book.

Flying saucers, telekinesis, sudden showers of fish from the sky, and spontaneous combustion are a few of the unexplained phenomena that Charles Fort (1874-1932) labeled "damned" -- his term for mysteries dismissed by scientific orthodoxy. This exploration of the gray area between science and fantasy was the prototype for extraterrestrial speculations and helped promote the development of

science fiction.
