Everyday Women's and Gender Studies is a text-reader that offers instructors a new way to approach an introductory course on women's and gender studies. This book highlights major concepts that organize the diverse work in this field: Knowledges, Identities, Equalities, Bodies, Places, and Representations. Its

focus on "the everyday" speaks to the importance this book places on students understanding the taken-for granted circumstances of their daily lives. Precisely because it is not the same for everyone, the everyday becomes the ideal location for cultivating students' intellectual capacities as well as their political investigations and interventions. In addition to exploring each concept in detail, each chapter includes up to five short readings that illuminate an aspect of that concept. Everyday Women's and Gender Studies explores the idea that "People are different, and the world isn't fair," and engages students in the inevitably complicated follow-up question, "Now that we know, how shall we live?"

This book presents an analysis of the various transformation processes at work in the international migratory dynamic of Mexicans as a consequence of the 2008 international economic crisis and the implementation of an increasingly strict American migration policy. Employing a methodology that combines qualitative and quantitative tools, the main findings of this work indicate that the international migration of Mexicans is moving towards a new phase, an era of "contraction and disengagement" that is characterized by the confluence of multiple changes with repercussions on the functioning of international migration as

a socioeconomic strategy at the family and migrant community levels.

Frank Brennan has been a long time advocate for human rights and social justice in Australia. This collection of essays brings together some of his major addresses and writings on justice in the Catholic Church and in Australian society. Placing the individual's formed and informed conscience as the centre piece in any work for justice, he surveys recent developments in the Catholic Church including the handling of child sexual abuse claims and the uplifting effect of the papacy of Francis, the first Jesuit pope. He then applies Catholic social teaching and the jurisprudence of human rights to contested issues like the separation of

powers and the right of religious freedom, and to the claims of diverse groups including Aborigines, asylum seekers, the dying, and same sex couples. At every step, he is there in the public square amplifying that still, small voice of conscience, especially the voice of those who are marginalised.

Today, roughly 70 percent of all visas for legal immigration are reserved for family members of permanent residents or American citizens. Family reunification—policies that seek to preserve family unity during or following migration—is a central pillar of current immigration law, but it has existed in some form in American statutes since at least the mid-nineteenth century. In *Fictive Kinship*, sociologist Catherine Lee delves into the fascinating history of family reunification to examine how and why our conceptions of family have shaped immigration, the meaning of race, and the way we see ourselves as a country. Drawing from a rich set of archival sources, *Fictive Kinship* shows that even the most draconian anti-immigrant

laws, such as the Chinese Exclusion Act of 1882, contained provisions for family unity, albeit for a limited class of immigrants. Arguments for uniting families separated by World War II and the Korean War also shaped immigration debates and the policies that led to the landmark 1965 Immigration Act. Lee argues that debating the contours of family offers a ready set of symbols and meanings to frame national identity and to define who counts as “one of us.” Talk about family, however, does not inevitably lead to more liberal immigration policies. Welfare reform in the 1990s, for example, placed limits on benefits for immigrant families, and recent debates over the children of undocumented immigrants fanned petitions to rescind birthright citizenship. *Fictive Kinship* shows that the centrality of family unity in the immigration discourse often limits the discussion about the goals, functions and roles of immigration and prevents a broader definition of American identity. Too often, studies of immigration policy focus on individuals or particular ethnic or

racial groups. With its original and wide-ranging inquiry, *Fictive Kinship* shifts the analysis in immigration studies toward the family, a largely unrecognized but critical component in the regulation of immigrants' experience in America.

Return to Sender is an anthropological account of how Peruvian emigrants raise and remit money and what that activity means for themselves and for their home communities. The book draws on first-hand ethnographic data from North and South America, Europe, and Japan to describe how Peruvians remit to relatives at home, collectively raise money to organize development projects in their regions of origin, and invest savings in business and other activities.

Karsten Paerregaard challenges unqualified approval of remittances

as beneficial resources of development for home communities and important income for home countries. He finds a more complex situation in which remittances can also create dependency and deprivation.

This is the first volume to fully explore the complex relationship between war and tourism by considering its full range of dynamics; including political, psychological, economic and ideological factors at different levels, in different political and geographical locations. Issues of peace and tourism are dealt with insofar as they pertain to the effects of war on tourism that emerge after the cessation of hostilities. The book therefore reveals how not only location, but also political strategies, accidents of history, transportation linkages, and economic expediency all have played their role in the development and continuation of tourism before, during, and after wartime. It further show how the effects of war are seldom if ever simply a negation or reversal of the effects of peace on tourism. The volume draws on a range of examples, from medieval times to the present, to reveal the multi-faceted development of tourism amidst and because of conflict in a wide variety of locations, including the Pacific, Europe, the Middle East, North America,

Africa and South East Asia, showing the diverse ways in which tourism and war interacts. In doing so it explores how some locations have been developed as tourist attractions primarily because of war and conflict, e.g. as resting and training places for troops, and others flourished because of the threat of danger from conflicts to more traditional tourist locations. This thought provoking volume contributes to the understanding of the interrelationships between war, peace and tourism in many different parts of the world at different scales. It will be valuable reading for all those interested in this topic as well as dark tourism, battlefield tourism and heritage tourism.

We Are Better Than This is a collection of essays and poetry addressing the Australian government's asylum seeker policy. The aims of the book are several: to provide some of the information about the situation in detention camps that is being withheld by the government; to correct some of the government's

misrepresentations of the current situation; to clarify some of the complex legal issues surrounding the right to seek asylum, and to give some insight into the plight of those who are seeking asylum. It is hoped that this book will better inform people about the government's policies: to support those who are unsatisfied and seeking to change the situation, as well as those who are uncertain and need more easily accessible and reliable information. Contributors are drawn from several areas of expertise and engagement with asylum seekers.

We Are Better Than This

This is a good time to reflect on opportunities and challenges for Australia in Latin America. Impressive economic growth and opportunities for trade and investment have made Latin America a dynamic area for Australia and the Asia Pacific region. A growing Latin American population, Australia's attractiveness to Latin American students, a fascination with the cultural vibrancy of the Americas and an awareness of Latin America's increasingly independent stance in

politics and economic diplomacy, have all contributed to raising the region's profile. This collection of essays provides the first substantial introduction to Australia's evolving engagement with Latin America, identifying current trends and opportunities, and making suggestions about how relationships in trade, investment, foreign aid, education, culture and the media could be strengthened.
