JAIDYN BARRON

Ideas, Examples, and Execution Rowman & Littlefield

This book will get librarians writing by dispelling the myths surrounding "scholarly writing" by providing practical tools and advice. Though the authors have extensive experience as scholars, this book is written in a friendly, approachable, non-intimidating manner.

Authoring a PhD Macmillan International Higher Education

It's not easy getting published, but everyone has to do it. Writing for Peer Reviewed Journals presents an insider's perspective on the secret business of academic publishing, making explicit many of the dilemmas and struggles faced by all writers, but rarely discussed. Its unique approach is theorised and practical. It offers a set of moves for writing a journal article that is structured and doable but also attends to the identity issues that manifest on the page and in the politics of academic life. The book comprehensively assists anyone concerned about getting published; whether they are early in their career or moving from a practice base into higher education, or more experienced but still feeling in need of further information.

Avoiding a "tips and tricks" approach, which tends to oversimplify what is at stake in getting published, the authors emphasise the production, nurture and sustainability of scholarship through writing with a focus on both the scholar and the text or what they call text work/identity work. The chapters are ordered to develop a systematic approach to the process, including such topics as: The writer The reader What's the contribution? Beginning work Refining the argument Engaging with reviewers and editors Writing for Peer Reviewed Journals uses a wide range of multi-disciplinary examples from the writing workshops the authors have run in universities around the world: including the UK, Canada, Australia, New Zealand, Ireland, South

Africa, Norway, Sweden, Denmark and the United States. This international approach coupled with theoretically grounded strategies to guide the authoring process ensure that people at all stages of their career are addressed. This lively book uses a combination of personal stories, student texts, published journal abstracts and excerpts from interviews with journal editors and publishers. Written in an accessible style, one which does not use the patronising "you" of advice books, it offers a collegial approach to a task which is difficult for most scholars, regardless of their years of experience.

Helping Doctoral Students Write SAGE

This book documents the results of a multi-year project that investigated the goals for writing improvement among 45 students and their instructors in intensive courses of English as a Second Language (ESL) then, a year later, in academic programs at two Canadian universities. The researchers present a detailed framework to describe these goals from the perspectives of the students as well as their instructors. The goals are analyzed for groups of students from particular backgrounds internationally, for changes over time, and in relation to the ESL and academic courses. The authors use activity theory, goal theory, various sociolinguistic concepts, and multiple data sources (interviews, observations, stimulated recalls, questionnaires, and text analyses) to provide a contextually-grounded perspective on learning, teaching, writing, second-language development, and curriculum policy. The book will interest researchers, educators, and administrators of ESL, university, college, and literacy programs around the world.

Strategies for Getting Published Rowman & Littlefield

This book provides an alternative to the more conventional modes of qualitative and quantitative inquiry currently used in professional training programs, particularly in education. It features a very accessible presentation that combines application, rationale, critique, and inspiration—and is itself an example of this kind of writing. It teaches students how to

use personal writing in order to analyze, explicate, and advance their ideas. And it encourages minority students, women, and others to find and express their authentic voices by teaching them to use their own lives as primary resources for their scholarship.

Unwritten Histories Jo Vanevery, Academic Career Guide

Authoring a PhD is a complex process. It involves having creative ideas, working out how to organize them, writing up from plans, upgrading the text, and finishing it speedily and to a good standard. It also includes being examined and getting published. Patrick Dunleavy has written *Authoring a PhD* based on his supervision experience with over 30 students. It provides solid advice to help your PhD students cope with both the intellectual issues and practical difficulties of organizing their work effectively. It is an indispensable and time saving aid for doctoral students in the humanities, social sciences, education, business studies, law, health, arts and visual arts, and related disciplines, and will also be a great help to supervisors.

Writing for Publication Springer

In this guide to academic writing the author takes the reader step-by-step through the writing and publication process—from choosing a subject, developing content that will engage others, to submitting the final manuscript for publication.

Writing for Peer Reviewed Journals

Routledge

Academic writing has its own ground rules and its own creativity. In this practical guide for students and academics, the author takes the reader step-by-step through the entire writing and publication process - from choosing a subject, to developing content, to submitting the final manuscript for publication. The book contains exercises, helpful checklists, exemplars and advice drawn from the author's experience.

Writing Accountability Groups: Bootcamp for Increasing Scholarly Productivity Jo Vanevery, Academic Career Guide

Writing for Publication deals with a

number of generic issues around academic writing (including intellectual property rights) and then considers writing refereed journal articles, books and book chapters in detail as well as other, less common, forms of publication for academics. The aim is to demystify the process and to help you to become a confident, competent, successful and published writer.

Writing for Scholarly Publication

Routledge

Finding Time for your Scholarly Writing addresses the problem of juggling writing alongside your other responsibilities. I identify three kinds of time, explain what kinds of writing you can do in each, and suggest ways of combining the three to ensure that you make the best use of the time available at different points in the academic year.

Issues, Problems, And Solutions University of Chicago Press

With growing academic responsibilities, family commitments, and inboxes, scholars are struggling to fulfill their writing goals. A finished book—or even steady journal articles—may seem like an impossible dream. But, as Joli Jensen proves, it really is possible to write happily and productively in academe. Jensen begins by busting the myth that universities are supportive writing environments. She points out that academia, an arena dedicated to scholarship, offers pressures that actually prevent scholarly writing. She shows how to acknowledge these less-than-ideal conditions, and how to keep these circumstances from draining writing time and energy. Jensen introduces tools and techniques that encourage frequent, low-stress writing. She points out common ways writers stall and offers workarounds that maintain productivity. Her focus is not on content, but on how to overcome whatever stands in the way of academic writing. *Write No Matter What* draws on popular and scholarly insights into the writing process and stems from Jensen's experience designing and directing a faculty writing program. With more than three decades as an academic writer, Jensen knows what really helps and hinders the scholarly writing process for scholars in the humanities, social sciences, and sciences. Cut down the academic sword of Damocles, Jensen advises. Learn how to write often and effectively, without pressure or shame. With her encouragement, writers of all levels will find ways to create the writing support they need and deserve.

Removing Redundancies from Scholarly Writing IAP

'A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company.' - Joan Bolker, author of *Writing Your Dissertation in Fifteen Minutes a Day*
'Humorous, direct, authentic ... a seamless weave of experience, anecdote, and research.' - Kathleen McHugh, professor and director of the UCLA Center for the Study of Women Wendy Laura Belcher's *Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success* is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in their fields. Each week, readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks, they send their article to a journal. This invaluable resource is the only guide that focuses specifically on publishing humanities and social science journal articles.

Compendium for Early Career Researchers in Mathematics Education Rowman & Littlefield

In scholarship, publication is the chief means of communicating research and a primary criterion for advancement, recognition, and reward in academic institutions. Yet, most scholars learn the skills of writing and the strategies of publishing in a capricious and sporadic manner. As the data on scholarly productivity show, failures abound. The aim of this book is to inform scholars and to facilitate their involvement in the publication process. Although guides are available to provide technical and procedural help, there is no other book that addresses the behavioral, attitudinal, and social process of writing and publishing. The authors successfully draw together their knowledge, experience, and data on the mysteries of publishing in order to put concrete guidelines in the hands of scholars with a strong stake in the publication process.

A Traveler's Guide to a Done Dissertation Aboriginal Studies Press

Good writing skills and habits are critical for scholarly success. Every article is a story, and employing the techniques of effective storytelling enhances scholars' abilities to share their insights and ideas, increasing the impact of their research. This book draws on the tools and techniques of storytelling employed in fiction and non-fiction writing to help academic writers enhance the clarity, presentation, and flow of their scholarly

work, and provides insights on navigating the writing, reviewing, and coauthoring processes.

Destination Dissertation Routledge

This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

A Guide for Non-native Writers of English SAGE

Designed to sit near where you write so you can refer to it whenever you get stuck, this Short Guide breaks down the scholarly writing process into stages and provides both a description of that stage and writing prompts to help you get unstuck. *Practical Tips for Publishing Scholarly Articles* Lyceum Books, Incorporated
A step-by-step guide to crafting a compelling scholarly book proposal—and seeing your book through to successful publication The scholarly book proposal may be academia's most mysterious genre. You have to write one to get published, but most scholars receive no training on how to do so—and you may have never even seen a proposal before you're expected to produce your own. The *Book Proposal Book* cuts through the mystery and guides prospective authors step by step through the process of crafting a compelling proposal and pitching it to university presses and other academic publishers. Laura Portwood-Stacer, an experienced developmental editor and publishing consultant for academic authors, shows how to select the right presses to target, identify audiences and competing titles, and write a project description that will grab the attention of editors—breaking the entire process into discrete, manageable tasks. The book features over fifty time-tested tips to make your proposal stand out; sample prospectuses, a letter of inquiry, and a response to reader reports from real authors; optional worksheets and checklists; answers to dozens of the most common questions about the scholarly publishing process; and much, much more. Whether you're hoping to publish your first book or you're a seasoned author with an unfinished proposal languishing on your

hard drive, *The Book Proposal Book* provides honest, empathetic, and invaluable advice on how to overcome common sticking points and get your book published. It also shows why, far from being merely a hurdle to clear, a well-conceived proposal can help lead to an outstanding book.

The Scholarly Writing Process West Academic

A concise, easy-to-read source of essential tips and skills for writing research papers and career management. [Preparing Your Manuscript for Peer Review](#)
Edward Elgar Publishing

Everything you need to identify and remove redundancies from scholarly writing. Scholarly writing is difficult because few graduate programs include formal instruction on how to expose research through writing. In addition, most students and researchers read scholarly works for content, not structure, grammar, and exposition. The result is scholarly authors who are surrounded by the writing they wish to emulate, but who do not know how to recognize and apply the principles of scholarly writing. This book provides: an overview of writing found in journal articles, dissertations, and theses; a discussion of redundancies found in all types of prose, including scholarly writing; multiple ways to learn to accommodate learning styles; 300 examples of the most common redundancies that appear in scholarly writing. Both practical and transformative, *Removing Redundancies from Scholarly Writing* teaches researchers how to produce journal articles, dissertations, and theses that are concise, clear, accurate, and reliable—the hallmarks of scholarly writing. Every researcher from student to veteran author will benefit from the approach to removing redundancies this book offers.
