### Ralph Vaughan

**Williams** University of Illinois Press  
Moving from web to field, from Victorian parlor to 21st-century mall, the 15 essays gathered here yield new insights regarding the intersection of local culture, musical creativity and technological possibilities. Inspired by the concept of "technoculture," the authors locate technology squarely in the middle of expressive culture: they are concerned with how technology culturally informs and infuses aspects of everyday life and musical experience, and they argue that this merger does not necessarily result in a "cultural grayout," but instead often produces

exciting new possibilities. In this collection, we find evidence of musical practices and ways of knowing music that are informed or even significantly transformed by new technologies, yet remain profoundly local in style and meaning. CONTRIBUTORS: Leslie C. Gay, Jr., Kai Fikentscher, Tong Soon Lee, René T. A. Lysloff, Matthew Malsky, Charity Marsh, Marc Perlman, Thomas Porcello, Andrew Ross, David Sanjek, jonathan Sterne, Janet L. Sturman, Timothy D. Taylor, Paul Théberge, Melissa West, Deborah Wong. Ebook Edition Note: Four of the 26 illustrations, and the cover illustration, have been redacted.

"Over the last thirty years, there have been very few volumes published in the UK devoted to the study

of folk song and the folk song revival, much of the research in the field appearing in the pages of the Folk Music Journal or coming from North America. This extensive collection of papers, while not comprehensive, is intended in part to fill this void and to make a contribution to the field of study. It is the unashamed product of a major conference to mark the centenary of the founding of the Folk-Song Society, held at the University of Sheffield, 10-12 July 1998, and organised jointly by the University's Department of Music and National Centre for English Cultural Tradition, together with the English Folk Dance and Song Society, the successor to the Folk-Song Society since its merger with the English Folk Dance Society in 1932."--p.1.

Concert audiences have an enduring affection for the music of Ralph Vaughan Williams a composer of dance, symphony, opera, song, hymnody, and film music and serious scholarship on his music is currently enjoying a revival. 2008 marks the 50th anniversary of Vaughan Williams passing (and 2007 his 135th birthday); his work particularly his orchestral music will likely find themselves programmed widely for this season, and groups like the RVW Society which regularly hold

symposiums may have events planned in honor of the composer. OUP-UK will be publishing a volume of Vaughan Williams Letters, edited by Hugh Cobbe, likely to pub in 2008. We should consider promoting the two volumes together. This collection brings together a host of lively writings some for the first time, and many for the first time since their initial publication by one of the most articulate, beloved and engaging English composers. Making available essays, articles, broadcasts, and speech transcripts from 1901-1958, Vaughan Williams on Music exemplifies the multi-faceted nature of his contributions: active supporter of amateur music and English music, a leader in the folksong revival, educator, performer, and polemicist. Vaughan Williams was one of the cultural giants of his day, a figure of iconic stature whose influence stretched far beyond musical circles; his friendships with Bertrand Russell and G. M. Trevelyan, and his tireless work on behalf of a variety of organizations and causes, from Jewish refugees to the Third Programme, gave him a

unique place in British national life. He also had a powerful influence in the United States, at a time when the special relationship was approaching its zenith. Through all these perspectives, the words are unmistakably those of a practicing composer a young composer at the turn of the last century, trying to find his own musical voice amid widely diverse stylistic influences of the dominant and successful figures of Brahms, Strauss, and Tchaikovsky, and a mature composer in the mid-century, having found that glorious voice which continues to resound across the globe. The volume will be an important contribution to the literature not only on British music, but also on nineteenth- and twentieth-century British cultural and intellectual life as a whole, placing Vaughan Williams's political and aesthetic thought in a broader cultural perspective. It will be a welcome read as well for the general audience which loves the music of Vaughan Williams, that will be listening to and remembering the composer as this anniversary of his death

approaches.

This text is designed to

help music students

become familiar with and

use the many research tools available to them. The content is arranged by type of research tool (e.g., encyclopedias, periodical indexes, discographies) and includes a general statement about the uses of each tool and an annotated bibliography that points out their purpose, scope, strengths, and weaknesses. Covering both print and electronic resources, the text does not attempt to be exhaustive but rather guides students to the major research tools in music. A companion Web site maintained by the author helps keep the material up to date. Intended primarily for music bibliography classes taken by almost all students entering graduate music programs, the text is also a useful supplement for any undergraduate or graduate class in music that requires students to do library research or write a research paper.

This comprehensive collection of 492 songs constitutes a body of work surprisingly large in

proportion and revealing in scope. Drawn from a wide selection of sources, it is the only collection of antislavery songs currently in print. The songs are organized in six sections representing variations of antislavery thought and activity. Compiled from songs originally printed with music, lyrics with designated tunes, and lyrics otherwise indicating that they were actually sung, the book follows a chronology that is historically meaningful. There is an explanatory introduction for each section, in which both the music and the lyrics are discussed. Sources are included for each song and five indexes provide ready access to author, title, tune, first line, and subject. The author's extensive introductory essay examines the historical background of the antislavery movement and its music.

This history of literary Arabic describes the evolution of Arabic poetry and prose in the context

of music, ritual performance, the arts and architecture. The thousands-of-years-old language is perhaps more highly developed and refined than any other on earth. This book focuses on what is unique about Arabic compared to other major languages of the world (Greek, Latin, Hebrew, English and Spanish) and how the distinct characteristics of Arabic took shape at various points in its history. The book provides a cultural background for understanding social and political institutions and religious beliefs—more influenced by the rhythms and depths of poetic language than other cultures—in the Middle East today.

The Encyclopedia of Great Popular Song Recordings, Volumes 1 and 2 covers the full range of popular music recordings with virtually unprecedented breadth and depth. In this 2-volume encyclopedia, Sullivan explores approximately 1,000 song recordings from 1889 to the present, telling the stories behind the songs, recordings, performers,

and songwriters. From the Victorian parlor ballad and ragtime hit at the end of the 19th century to today's rock classics, the Encyclopedia progresses through a parade popular music styles, from jazz to blues to country Western, as well as the important but too often neglected genres of ethnic and world music, gospel, and traditional folk. This book is the ideal research tool for lovers of popular music in all its glorious variety.
