Os softwares da SAP estão presentes nas grandes e médias corporações que criam produtos consumidos por nós diariamente. Isso tudo foi construído ao longo de mais de 30 anos de trabalho, com o apoio de uma linguagem de programação proprietária amplamente utilizada, o ABAP. Por conta de sua longa existência e de um mercado um pouco fechado, o ABAP é visto como uma linguagem velha e antiquada, incapaz de atender os

anseios e vontades de programadores mais jovens. Mas será que isso é realmente um fato ou uma constatação baseada puramente no tempo de sua existência? Neste livro, Mauricio Roberto Cruz vai passar por todos os estágios da vida de um programador ABAP: os primeiros passos, funcionamento do mercado, decisões de carreira, discussões sobre tabus, formas de encarar o trabalho e o futuro da linguagem. Com isso, iniciantes poderão iniciar um caminho sem incorporar vícios antigos e profissionais da área poderão repensar a forma como encaram o seu trabalho. O ABAP está em constante evolução. Torne-se um profissional moderno e evolua com ele!
