Preserved in music, dance, and art—as well as in ritual, tribal law, and mythology—the fighting arts of the Indonesian archipelago play a central role in Indonesian culture. The Martial Arts of Indonesia is a heavily illustrated and well-researched work from revered martial arts scholar and teacher Donn F. Draeger. Draeger offers an expert's perspective on the story of Indonesia's martial culture, providing a comprehensive introduction to the

sophisticated forms of empty-hand combat.

These acrobatic fighting styles like Pencak Silat—which was granted World Cultural Heritage status by UNESCO in 2019—and Kuntao are growing in popularity around the world. This book also has extensive information on traditional Indonesian weapons including: Keris: A dagger with a waved blade and pistol-grip handle Kujang: A sickle-shaped dagger with a distinctive curve Rencong: An L-shaped knife with a slightly curved blade Draeger shows how these unique Indonesian forms are related to their mainland cousins, provides a historical context for their development, and describes the various

combat methods employed throughout Indonesia. This edition includes a new foreword by Gary Nathan Gartenberg, the world's leading expert on Indonesian martial arts, which explains the lasting importance of this classic study of an ancient martial tradition. With over 400 photos and illustrations of moves and weapons that showcase the intricacies of the Indonesian fighting forms, *The Martial Arts of Indonesia* is an indispensable addition to any martial artist's library.

Chomsky proposes a reformulation of the theory of transformational generative grammar that takes recent developments in the descriptive analysis of particular languages into account. Beginning in the mid-fifties and emanating largely from MIT, an approach was

developed to linguistic theory and to the study of the structure of particular languages that diverges in many respects from modern linguistics. Although this approach is connected to the traditional study of languages, it differs enough in its specific conclusions about the structure and in its specific conclusions about the structure of language to warrant a name, "generative grammar." Various deficiencies have been discovered in the first attempts to formulate a theory of transformational generative grammar and in the descriptive analysis of particular languages that motivated these formulations. At the same time, it has become apparent that

these formulations can be extended and deepened. The major purpose of this book is to review these developments and to propose a reformulation of the theory of transformational generative grammar that takes them into account. The emphasis in this study is syntax; semantic and phonological aspects of the language structure are discussed only insofar as they bear on syntactic theory.

Towards Realization of the Higher Intentions of Islamic Law Wm. B. Eerdmans Publishing
"This is an excellent

and rare exploration of a sensitive religious issue from many perspectives _ legal, cultural and political. The case studies from Indonesia, Malaysia, Singapore and Thailand portray the important and exciting, yet very difficult, negotiation of Islamic teachings in the changing realities of Southeast Asia, home to the majority of Muslims in the world. Interreligious marriage is an important indicator of good relations between communities in religiously diverse countries. This book will also be of great interest to students and scholars of religious pluralism in a Southeast Asian context, which has not been studied adequately." - Zainal Abidin Bagir, Executive

Director, Center for Religious and Cross-cultural Studies (CRCS), Gadjah Mada University, Indonesia
 "The issue of Muslim-non-Muslim marriages has different connotations in the different Southeast Asian states. For example, in Thailand it is more a fluid cultural issue but in Malaysia it reflects great racial schisms with severe legal implications. This book is a welcome one as it examines the issue not only from the perspectives of various Southeast Asian nations but also from so many angles; the legal, historical, social, cultural, anthropological and philosophical. The work is scholarly, yet accessible. Underlying it, there is a vital streak of humanism." -

 The Leadership of Muhammad is a very personal study of the life-story and leadership skills of the Prophet. John Adair served with a Bedouin regiment in the Arab Legion and this story is full of fascinating detail of desert life and

John Adair weaves the story of Muhammad's life together with aspects of Bedouin culture and ancient proverbs to provide key points for leaders and aspiring leaders. He discusses tribal leadership and essential attributes such as integrity, moral authority and humility. Learning and leadership go hand in hand. You are not born a leader, but you can become one and it is never too late to learn. John Adair's study of Muhammad and the tribal tradition of leadership is an essential addition to the

leadership debate.

Professor David C. McClelland is chiefly known for his work on achievement motivation, but his research interests extended to personality and consciousness. He pioneered workplace motivational thinking, developing achievement-based motivational theory and models, and promoted improvements in employee assessment methods, advocating competency-based assessments and tests, arguing them to be better than traditional IQ and personality-based tests. His ideas have since been widely adopted in many organisations, and relate closely to the theory of Frederick Herzberg. He is most noted for describing

three types of motivational need, which he identified in this book, *The Achieving Society*: 1. achievement motivation (n-ach), 2. authority/power motivation (n-pow), 3. affiliation motivation (n-affil). First published in 1961, his classic book provides a factual basis for evaluating economic, historical, and sociological theories that explain the rise and fall of civilizations.

Muslim-Non-Muslim Marriage ITBM

The oldest Islamic biography of Muhammad, written in the mid-eighth century, relates that the prophet died at Medina in 632, while earlier and more numerous Jewish, Christian, Samaritan, and even Islamic sources indicate that Muhammad survived to

lead the conquest of Palestine, beginning in 634-35. Although this discrepancy has been known for several decades, Stephen J. Shoemaker here writes the first systematic study of the various traditions. Using methods and perspectives borrowed from biblical studies, Shoemaker concludes that these reports of Muhammad's leadership during the Palestinian invasion likely preserve an early Islamic tradition that was later revised to meet the needs of a changing Islamic self-identity. Muhammad and his followers appear to have expected the world to end in the immediate future, perhaps even in their own lifetimes, Shoemaker contends. When the

eschatological Hour failed to arrive on schedule and continued to be deferred to an ever more distant point, the meaning of Muhammad's message and the faith that he established needed to be fundamentally rethought by his early followers. The larger purpose of *The Death of a Prophet* exceeds the mere possibility of adjusting the date of Muhammad's death by a few years; far more important to Shoemaker are questions about the manner in which Islamic origins should be studied. The difference in the early sources affords an important opening through which to explore the nature of primitive Islam more broadly. Arguing for

greater methodological unity between the study of Christian and Islamic origins, Shoemaker emphasizes the potential value of non-Islamic sources for reconstructing the history of formative Islam.

This book addresses contemporary debates on civil disobedience in Islam within the rich Sunni tradition, especially during the height of the non-violent people revolution in various Arab countries, popularly known as the Arab Spring. It illustrates the Islamic theological and jurisprudential arguments presented by those who either permit or prohibit acts of civil disobedience

for the purpose of changing government, political systems or policy. The book analyses the nature of the debate and considers how a theological position on

civil disobedience should be formulated in contemporary time, and makes the case for alternatives to violent political action such as jihadism, terrorism and armed rebellion.
