This volume in the highly respected Cambridge History of Science series is devoted to the history of science, medicine and mathematics of the Old World in antiquity. Organized by topic and culture, its essays by distinguished scholars offer the most comprehensive and up-to-date history of ancient science currently available. Together, they reveal the diversity of goals, contexts, and accomplishments in the study of nature in

Mesopotamia, Egypt, Greece, Rome, China, and India. Intended to provide a balanced and inclusive treatment of the ancient world, contributors consider scientific, medical and mathematical learning in the cultures associated with the ancient world. [Ancient Mesopotamia](#) Oxford University Press Described by the editor as unpretentious roamings on the odd little byways of the history of ancient Mesopotamia, these 15 articles were originally published in the French journal L'Histoire and are designed to serve as an introductory sampling of the historical research on the lost civilization. Chapters explore cuisine, sexuality, women's rights, architecture, magic and

medicine, myth, legend, and other aspects of Mesopotamian life. Originally published as *Initiation a l'Orient ancien*. Whether hailed as heroes or cast as threats to social order, entrepreneurs--and their innovations--have had an enormous influence on the growth and prosperity of nations. The Invention of Enterprise gathers together, for the first time, leading economic historians to explore the

entrepreneur's role in society from antiquity to the present. Addressing social and institutional influences from a historical context, each chapter examines entrepreneurship during a particular period and in an important geographic location. The book chronicles the sweeping history of enterprise in Mesopotamia and Neo-Babylon; carries the reader through the Islamic Middle East; offers insights into the entrepreneurial history of China, Japan, and Colonial India; and describes the crucial role of the entrepreneur in innovative activity in Europe and the United States, from the medieval period to today. In considering the critical contributions of entrepreneurship, the authors discuss why entrepreneurial activities are not always productive and may even sabotage prosperity. They examine the institutions and restrictions that have enabled or impeded innovation, and the incentives for the adoption and dissemination of inventions. They also describe the wide variations in global entrepreneurial activity

during different historical periods and the similarities in development, as well as entrepreneurship's role in economic growth. The book is filled with past examples and events that provide lessons for promoting and successfully pursuing contemporary entrepreneurship as a means of contributing to the welfare of society. The Invention of Enterprise lays out a definitive picture for all who seek an understanding of innovation's central place in our world.

Daily Life in Ancient Mesopotamia Walter de Gruyter GmbH & Co KG Provides a new narrative history of the ancient world, from the beginnings of civilization in the ancient Near East and Egypt to the fall of Constantinople Written by an expert in the field, this book presents a narrative history of Babylon from the time of its First Dynasty (1880-1595) until the last centuries of the city's existence during the Hellenistic and Parthian periods (ca. 331-75 AD). Unlike other texts on Ancient Near Eastern and Mesopotamian history, it offers a unique focus on Babylon and Babylonia, while still providing

readers with an awareness of the interaction with other states and peoples. Organized chronologically, it places the various socio-economic and cultural developments and institutions in their historical context. The book also gives religious and intellectual developments more respectable coverage than books that have come before it. *A History of Babylon, 2200 BC – AD 75* teaches readers about the most important phase in the development of Mesopotamian culture. The book offers in-depth chapter coverage on the Sumero-Addadian Background, the rise of Babylon, the decline of the first dynasty, Kassite ascendancy, the second dynasty of Isin, Arameans and Chaldeans, the Assyrian century, the imperial heyday, and Babylon under foreign rule. Focuses on Babylon and Babylonia Written by a highly regarded Assyriologist Part of the very successful *Histories of the Ancient World* series An excellent resource for students, instructors, and scholars *A History of Babylon, 2200 BC - AD 75* is a profound text that will be ideal for upper-level

undergraduate and graduate courses on Ancient Near Eastern and Mesopotamian history and scholars of the subject. *Handbook to Life in Ancient Mesopotamia* Getty Publications Situated in an area roughly corresponding to present-day Iraq, Mesopotamia is one of the great, ancient civilizations, though it is still relatively unknown. Yet, over 7,000 years ago in Mesopotamia, the very first cities were created. This is the first book to reveal how life was lived in ten Mesopotamian cities: from Eridu, the Mesopotamian Eden, to that potent symbol of decadence, Babylon - the first true metropolis: multicultural, multi-ethnic, the last centre of a dying civilization. *Materiality of Writing in Early Mesopotamia* Blastoff! Discovery The legacy of past civilizations is still with us today. In *Ancient Mesopotamia*, readers discover the history and impressive accomplishments of the ancient Mesopotamians, including their extraordinary cultural achievements and technological wonders. Engaging text provides details on the civilization's

history, development, daily life, culture, art, technology, warfare, social organization, and more. Well-chosen maps and images of artifacts bring the past to life. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO. *The Interpretation of Dreams in the Ancient Near East, with a Translation of an Assyrian Dream Book* Mohr Siebeck "This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, *New York Times Book Review* *Ancient Mesopotamia*—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor

Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, Book Week "Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."—Samuel Noah Kramer, *Archaeology* A. This anthology translates and discusses texts

authored by women of ancient Mesopotamia. *The Loss of Male Sexual Desire in Ancient Mesopotamia* Infobase Publishing
After more than fifty years since the last publication, the cuneiform texts relating to the treatment of the loss of male sexual desire and vigor in Mesopotamia are collected in this volume. The aim of the book is to present Mesopotamian medical tradition regarding the so-called *nīš libbi* therapies. *Šà-zi-ga* in Sumerian, *nīš libbi* in Akkadian, lit. "raising of the 'heart'", is the expression used to indicate a group of texts intended to recover the male sexual desire. This medical tradition is preserved from the Middle Babylonian period to the Achaemenid one. This broad range testifies to the importance of the transmission of this material throughout Mesopotamian history. The book provides the edition of this textual corpus and analyzes it in the light of new knowledge on ancient Near Eastern medicine. Moreover, this volume aims to show how theories and methodologies of Cultural Anthropology,

Ethnopsychiatry and Gender Studies are useful for understanding the Mesopotamian medical system. This edition is an important tool for understanding Mesopotamian medical knowledge for Assyriologist, however since the texts have been translated and discussed using the anthropological and gender perspectives they are accessible also to scholars of other research fields, such as History of Medicine, Sexuality and Gender.

Cambridge University Press
The late W.G. Lambert (1926-2011) was one of the foremost Assyriologists of the latter part of the twentieth century. His principle legacy is a large number of superb critical editions of Babylonian literary compositions. Many of the texts he edited were on religious and mythological subjects. He will always be remembered as the editor of the *Babylonian Job* (*Ludlul bel nemeqi*, also known as the *Poem of the Righteous Sufferer*), the *Babylonian Flood Story* (*Atra-hasis*) and the *Babylonian Creation Epic* (*Enuma elish*). The present book is a

collection of twenty-three essays Lambert published between the years 1958 and 2004. These endure not only as the legacy of one of the greatest authorities on ancient Mesopotamian religion and mythology, but also because each makes statements of considerable validity and importance. As such, many are milestones in the fields of Mesopotamian religion and mythology.

The first general introduction to Mesopotamia that covers all four of the area's major ancient civilizations-- Sumer, Akkad, Assyria, and Babylonia. *Ancient Mesopotamia: New Perspectives* ranges from the region's cultural beginnings to its Persian "liberation," from simple farmers to mighty kings, from the marshy Gulf shores and Arabian desert sands to the foothills of the Taurus and Zagros mountains. It is the first volume to capture the entire sweep of Mesopotamia's four major ancient cultures (Sumerian, Akkadian, Assyrian, Babylonian) in one concise and captivating volume.

Ancient Mesopotamia reveals how archaeologists, geologists, geographers, and other scientists have pieced together an understanding of some of the most complex and accomplished civilizations in history: their economies, social orders, political systems, religions, intellectual accomplishments, and material culture. It offers a wealth of information and insights into the glorious past of a land in turmoil today. Original materials and documents, including quotations from the world's first written literature Detailed chronology of the kings of major Mesopotamian states, including neighboring Elam, with summaries of the major periods of prehistoric and historical development
Ancient Mesopotamia: Portrait of a Dead Civilization Britannica Educational Publishing
Civilization was born eight thousand years ago, between the floodplains of the Tigris and Euphrates rivers, when migrants from the surrounding mountains and deserts began to create increasingly sophisticated urban societies. In the cities that they built, half of human history took

place. In Babylon, Paul Kriwaczek tells the story of Mesopotamia from the earliest settlements seven thousand years ago to the eclipse of Babylon in the sixth century BCE. Bringing the people of this land to life in vibrant detail, the author chronicles the rise and fall of power during this period and explores the political and social systems, as well as the technical and cultural innovations, which made this land extraordinary. At the heart of this book is the story of Babylon, which rose to prominence under the Amorite king Hammurabi from about 1800 BCE. Even as Babylon's fortunes waxed and waned, it never lost its allure as the ancient world's greatest city. Engaging and compelling, *Babylon* reveals the splendor of the ancient world that laid the foundation for civilization itself.
Babylon University of Chicago Press
Celebrated for numerous developments in the areas of law, writing, religion, and mathematics, Mesopotamia has been immortalized as the cradle of civilization. Its fabled cities, including Babylon and Nineveh,

spawned new cultures, traditions, and innovations in art and architecture, some of which can still be seen in present-day Iraq, Iran, Syria, and Turkey. Readers will be captivated by this ancient culture's rich history and breadth of accomplishment, as they marvel at images of the magnificent temples and artifacts left behind.

Mesopotamia, in modern-day Iraq, was home to the remarkable ancient civilizations of Sumer, Akkad, Babylonia, and Assyria. From the rise of the first cities around 3500 BCE, through the mighty empires of Nineveh and Babylon, to the demise of its native culture around 100 CE, Mesopotamia produced some of the most powerful and captivating art of antiquity and led the world in astronomy, mathematics, and other sciences—a legacy that lives on today.

Mesopotamia: Civilization Begins presents a rich panorama of ancient Mesopotamia's history, from its earliest prehistoric cultures to its conquest by Alexander the Great in 331 BCE. This catalogue records the

beauty and variety of the objects on display, on loan from the Louvre's unparalleled collection of ancient Near Eastern antiquities: cylinder seals, monumental sculptures, cuneiform tablets, jewelry, glazed bricks, paintings, figurines, and more. Essays by international experts explore a range of topics, from the earliest French excavations to Mesopotamia's economy, religion, cities, cuneiform writing, rulers, and history—as well as its enduring presence in the contemporary imagination.
