While GraphQL is a technology mainly driven by the needs of clients, there is a clear lack of resources on how to build reliable GraphQL servers. Over the last few years, I helped build and maintain some of the biggest GraphQL APIs out there at both Shopify and GitHub. During those years, I also worked with various companies with their adoption of GraphQL. From my experiences with GraphQL, I've observed the good, the bad, and the ugly. This led to many talks and blog posts on the subject, but still found that teams and individuals willing to use GraphQL in a pragmatic way lacked the resources to do so. This is what lead me to write this book: A collection of learnings and good practices when building GraphQL schemas at scale. Every language and every GraphQL implementation does things slightly differently. This book is completely language agnostic and instead focuses on concepts and patterns that are achievable no matter how you're building a GraphQL server. Think of it as a complete journey of what goes into building a GraphQL API, from design, to architectures, to implementation, and even documentation.

The soft crash of waves that blissfully block out all other noise, the smell of two-stroke and lawn clippings, the first sip of cold beer, the laboured whir of the ceiling fan, the sound of a bag of ice hitting the pavement, that feeling of salt on skin and even the smell of prawns on bin night. Comedian Tim Ross uses the Australian Summer as a back drop for a new collection of nostalgic short stories.

A critical text on feedback and assessment for all teacher educators. Feedback can be key to learning, but its potential value is not always fulfilled in practice. Developing a more nuanced understanding of feedback is particularly crucial in the ITE sector where ITE students receive feedback as learners but also give feedback to their pupils, and teacher educators need to provide feedback to their students and also guide them to give effective feedback to their pupils. This book explores what feedback means in the ITE sector and more broadly within education. It discusses the relational, pedagogical and moral dimensions of feedback conceptualized by student teachers, drawing on research data and supporting teacher educators considering the implications for their own practice. It includes discussion of placement and academic assessment / feedback practice as well as referencing the Teachers' Standards, the Core Framework for ITT and recommendations from the Carter Review.

Book two in The Mysteries of New Venice, the steampunk adventure series The Guardian called a "magnificent achievement" It's 1907 in the icily beautiful New Venice, and the hero of the city's liberation, Brentford Orsini, has been deposed by his arch-rival -- who immediately assigns Brentford and his friends on a dangerous diplomatic mission to Paris. So, Brentford recruits his old friend and louche counterpart, Gabriel d'Allier, underground chanteuse and suffragette Lillian Lake, and the mysterious Blankbate--former Foreign Legionnaire and leader of the Scavengers, the city's garbage collecting cult--and others, for the mission. But their mode of transportation--the untested "transaerian psychomotive"--proves faulty and they find themselves transported back in time to Paris 1895 ... before New Venice even existed. What's more, it's a Paris experiencing an unprecedented and crushingly harsh winter. They soon find themselves involved with some of the city's seediest, most fascinating inhabitants. But between attending soirees at Mallarmé's house, drinking absinthe with Proust, trying to wrestle secrets out of mesmerists, and making fun of the newly-constructed Eiffel Tower, they also find that Paris is a city full of intrigue, suspicion, and danger. For example, are the anarchists they encounter who are plotting to bomb the still-under construction Sacre Coeur church also the future founders of New Venice? And why are they trying to kill them? And, as Luminous Chaos turns into another lush adventure told in glorious prose rich in historical allusion, there's the biggest question of them all: How will they ever get home? ebook ISBN: 978-1-61219-142-3

This collection, which won the 2015 Costa Poetry Award, is an exhibition of the Dundee-born poet's stunningly accomplished adoption of the sonnet's ancient structure This collection from Don Paterson, his first since the Forward Prize-winning *Rain* in 2009, is a series of forty luminous sonnets. Some take a traditional form, while others experiment with the reader's conception of the sonnet, but they all share the lyrical intelligence and musical gift that has made Paterson one of our most celebrated poets. Addressed to friends and enemies, the living and the dead, children, musicians, poets, and dogs, these poems are as ambitious in their scope and tonal range as in the breadth of their concerns. Here, voices call home from the blackout and the airlock, the storm cave and the *s*hance, the coal shed, the war, the highway, the forest, and the sea. These are voices frustrated by distance and darkness, which ring with the "sound that fades up from the hiss, / like a glass some random downdraught had set ringing, / now full of its only note, its lonely call." In 40 Sonnets, Paterson returns to some of his central themes—contradiction and strangeness, tension and transformation, the dream world, and the divided self—in some of the most powerful and formally assured poems of his career.

If any country was born to holiday, it's Australia. Sun, space, beaches - the desire to hit the road and "get out of town" remains a strong and enduring part of our cultural identity. Many of us remember the summer ritual of packing up the car with half the stuff we owned and heading for our chosen "spot" in often incident-packed road trips. Central to those memorable journeys was the motel. "We'll stay a night in Gundagai," Dad would say, to break up the trip. Discovering the configuration of a new motel was all part of the holiday adventure - did it have a colour TV? The little packs of cereal? A couple of complimentary Arrowroots to go with the free tea and coffee? Bricks on the inside as well as the out? In his new book *Motel*, Tim Ross captures the heyday of Australia's motels via a deep trawl through the National Archives, presenting a fascinating slideshow of Australians on holidays between 1950 and 1989. A pictorial love letter to a somewhat bygone era, it captures the accessible glamour and car-friendly convenience of the road-side motel, from Gold Coast 'palaces' to out-of-the-way comfort stops (some with attached restaurant! Dinner: 6.30-8pm). Motel is an affectionate tribute to one of this country's greatest democratic institutions. From Prime Ministers to punters, at some stage we've all had to lay our head down at a welcoming motel as the sun sets on the highway.

*Zuzu's Petals* is about present society's obsession with the past, entertainment, escape, and technology. It suggests that, for better or worse, life necessarily must be lived in within the confines of the "culture industry." The story relates the travails of Jules and Julie, a couple whose marriage is in the process of breaking apart. Jules has a "fanboyish" obsession with the 1946 Frank Capra film *It's a Wonderful Life*. Like the protagonist in Samuel Beckett's *Krapp's Last Tape*, he is fixated on his own past, and his eccentric behavior has caused his disenchanted wife to seek romantic and emotional solace in David, an old flame from high school. Their child, Zuzu, who was named at Jules' insistence after a key character in the Capra film, has herself sensed that something is amiss in her parents' dealings with each other. The story is set centrally during a Christmas pageant during which parents are watching the event entirely through the mediated lens of a video camera, missing the live, real event (which admittedly is itself mediated through senses, the eyes). It explores the effects that both old and new technologies have on spouses, lovers, parents, and children, and how one attempts to negotiate worlds of reality and fiction, especially when that which is make-believe is so obviously preferred, as is the case with Jules, the central character.
