The aim of Molecular and Nano Electronics: Analysis, Design and Simulation is to draw together contributions from some of the most active researchers in this new field in order to illustrate a theory guided-approach to the design of molecular and nano-electronics. The field of molecular and nano-electronics has driven solutions for a post microelectronics era, where microelectronics dominate through the use of silicon as the preferred material and photo-lithography as the fabrication technique to build binary devices (transistors). The construction of such devices yields gates that are able to perform Boolean operations and can be combined with computational systems, capable of storing, processing, and transmitting digital signals encoded as electron currents and charges. Since the invention of the integrated circuits,

microelectronics has reached increasing performances by decreasing strategically the size of its devices and systems, an approach known as scaling-down, which simultaneously allow the devices to operate at higher speeds. \* Provides a theory-guided approach to the design of molecular and nano-electronics \* Includes solutions for researchers working in this area \* Contributions from some of the most active researchers in the field of nano-electronics

*Manual of Psychosocial Rehabilitation* Abingdon Press

While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

**Pastoral Care** Southwater Publishing  
Published on the birth centenary of J. Krishnamurti, *Fire in the Mind* is a book of important discussions conducted with Krishnamurti. Held from the end of the 1960s to 28 December 1985, seven weeks before his death on 17 February 1986, these dialogues cover a vast ocean of human concerns—fear, sorrow, death, time, culture, ageing and the renewal of the brain. They also explore subjects that are central to scientific research today, such as the questions of biological survival, the nature of consciousness, artificial intelligence, computers and the mechanical mind. J. Krishnamurti needs no introduction. A sage, a seer, a religious revolutionary and a teacher of profound compassion, Krishnamurti negated all spiritual authority. He sought freedom from the Guru, the book, tradition and the authoritarian voice of another. 'Truth is within you', he said, and to discover that truth in the luminous light of perception was to transform the very nature of thought and consciousness. It was to awaken intelligence, insight and an abundant compassion. The total responsibility lay with the individual. No one could free another from bondage. These dialogues reveal Krishnamurti's approach to self-knowing and his way of investigation into the brain, the mind and the consciousness. In a world brought to the edge of the abyss by growing violence, soaring religious fundamentalism, the desecration of nature and a massive assault on human integrity, they provide a new direction to those of us seeking an alternative way of life.

*Psychosocial Rehabilitation* is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.

The statistics are appalling. Between 8% and 10% of U.S. high school students carry guns to school every day. In a typical mid-size city, 30 to 50 cases of school violence are reported daily, and half of these cases

involve guns. School Violence:

*Assessment, Treatment, Prevention* shows us the reality behind the statistics. Its distinguished contributors include leading clinicians, researchers, school counselors, and legal authorities who closely examine every aspect of this complex epidemic, challenging us to solve this multifaceted public health problem and offering concrete recommendations on how to do it. The comprehensive volume is divided into four parts: Part I, Contributing Factors, presents the multiple contributing factors, including those involved in creating violent children and violence-prone schools, the nature and context of school violence, and its biological and cultural causes. For example, although the number of violent deaths by shooting in schools remained stable through the 1990s, the number of violent acts against female students increased significantly, as did gang activity and the availability of guns in schools. Part II, Assessment and Management, details diagnostic assessment, management, and treatment of children and adolescents who have the potential for or have threatened school violence. Eyewitnesses describe the shootings and their aftermaths in Pearl, Mississippi, and Littleton, Colorado, including the extensive measures taken to decrease the traumatic effect of these incidents on the children and adolescents and their families, the educators, and the community at large. Also presented is a model for time-limited, cognitive-behavioral group therapy for those who sustain or witness violent injuries in schools -- a model that could be adapted to other settings. Part III, Legal Aspects, begins by putting us on notice that anyone aware of a potentially violent act by a youth has a legal responsibility to alert the intended victim(s) and others who could warn or protect them, offering a uniquely insightful view -- by the plaintiff attorney for the victims of school violence in Paducah, Kentucky -- of the Tarasoff case and its ramifications. Part IV, Prevention, concludes with what we can do now to help prevent school violence, detailing effective prevention measures that range from the innovative (a method that focuses on the school as a whole rather than on individuals and uses a social system and power-dynamics perspective) to the everyday (teaching tolerance and conflict resolution). Psychiatric practitioners, clinical social workers, pediatricians, art and activity therapists, school counselors and administrators, and other educators and mental health care professionals -- and concerned adults -- who want to help prevent violence in our

schools and minimize its traumatic effects on children, parents, and the community at large will appreciate this lucid, in-depth treatment of what has become one of today's most disturbing issues.
