spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can. The book breaks new ground in suggesting a radical alternative to religion. It offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions. It also challenges current views of causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality. It develops and

elaborates a notion of the 'noosphere' within a theoretical system, this enables the notion to assume a scientific importance which it currently lacks because it is treated as an isolated, eccentric and rather mystical idea. to be both inspiring and entertaining. The book represents the modern, progressive spirit which fits that time, in its forms of expression and its editorship. The purpose of this work is to answer the why, who, what, when, where, how of the wide majority of curious minds, both young and adult, and encourage them to raise further questions. Special measures were taken in creating this work to isolate essentials from non-essentials; to differentiate human interest subjects of universal significance from those of little concern; to deliver living truths instead of dead vocabulary; and finally, to bring the whole within the knowledge of the intermediate reader,

without regard to age, in an acceptable and exciting form. The use of visual outlines and tables; maps, drawings, and diagrams; the illustrated works of great painters, sculptors, and architects all are used to give the reader the valuable and cultural knowledge of past and present.

leading scholar's considered assessment of the authors, works, cultural traditions, events, and ideas that shaped the literary voices of their age. The series will enlighten and inspire not only everyone studying, teaching, and researching in English Literature, but all serious readers. This book describes and seeks to explain the vast cultural, literary, social, and political transformations which characterized the period 1000-1350. Change can be perceived everywhere at this time. Theology saw the focus shift from God the Father to the suffering Christ, while religious experience became ever more highly charged with emotional affectivity and physical

devotion. A new philosophy of interiority turned attention inward, to the exploration of self, and the practice of confession expressed that interior reality with unprecedented importance. The old understanding of penitence as a whole and unrepeatable event, a second baptism, was replaced by a new allowance for repeated repentance and penance, and the possibility of continued purgation of sins after death. The concept of love moved centre stage: in Christ's love as a new explanation for the Passion; in the love of God as the only means of governing the self; and in the appearance of narrative fiction, where heterosexual love was suddenly represented

as the goal of secular life. In this mode of writing further emerged the figure of the individual, a unique protagonist bound in social and ethical relation with others; from this came a profound recalibration of moral agency, with reference not only to God but to society. More generally, the social and ethical status of secular lives was drastically elevated by the creation and celebration of courtly and chivalric ideals. In England the ideal of kingship was forged and reforged over these centuries, in intimate relation with native ideals of counsel and consent, bound by the law. In the aftermath of Magna Carta, and as parliament grew in

reach and importance, a politics of the public sphere emerged, with a literature to match. These vast transformations have long been observed and documented in their separate fields. The Oxford English Literary History: Volume 1: 1000-1350: Conquest and Transformation offers an account of these changes by which they are all connected, and explicable in terms of one another. *Libro* Oxford University Press
