The National Stroke Strategy (2007) is a comprehensive response to the concerns raised by the NAO in its 2005 report on stroke (HC 452, session 2005-06, ISBN 9780102935707). The strategy has been underpinned by strong national leadership and performance indicators as well as £59 million of central funding over the first two years, £30 million of which was allocated to local authorities specifically to provide support services to stroke patients and their carers. The NHS is now starting to deliver better care from stroke services, and outcomes for patients are also improving. Patients treated in a specialist stroke unit are more likely to survive, have fewer complications and regain their independence, but in 2008 only 17 per cent of stroke patients reached the stroke unit within four hours of arrival at hospital. Brain imaging is also very important for stroke patients but many patients are not given a scan quickly enough and access at weekends and evenings is significantly more limited. There is better awareness of the symptoms of stroke, and that it is a medical emergency, following the Department's 'Stroke: Act FAST' advertising campaign, launched in February 2009. The number of calls categorised as being a suspected stroke during April to June 2009 increased by 54 per cent in comparison with the same period in 2008. But a third of patients are not getting a follow-up appointment within six weeks and only a half of stroke survivors in the NAO's survey said that they were given advice on further stroke prevention when leaving hospital.

According to the media, Donald Trump could never become president. Now many are on a mission to prove he shouldn't be president. The Trump administration and the press are at war—and as in any war, the first casualty has been truth. Bestselling author Howard Kurtz, host of Fox News's Media Buzz and former Washington Post columnist, offers a stunning exposé of how supposedly objective journalists, alarmed by Trump's success, have moved into the opposing camp. Kurtz's exclusive, in-depth, behind-the-scenes interviews with reporters, anchors, and insiders within the Trump White House reveal the unprecedented hostility between the media and the president they cover. In Media Madness, you'll learn: Why White House strategist Steve Bannon told Trump he is in danger of being impeached How the love-hate relationship between the president and Morning Joe hosts—Joe Scarborough and Mika Brzezinski—turned entirely to hate How Kellyanne Conway felt betrayed by journalists who befriended her—and how she fought back How elite, mainstream news reporters—named and quoted—openly express their blatant contempt for Trump How Bannon tried to block short-lived Communications Director Anthony Scaramucci—and why Trump soured on him How Ivanka and Jared Kushner aren't the liberals the pundits want them to be—and why Trump tried to discourage them from joining the White House Why Trump believes some journalists harbor hatred for him—and how some liberals despise his voters How Trump is a far more pragmatic politician than the press often acknowledges (and how the press dismisses his flip-flops when he flops their way) What Trump got wrong about Charlottesville—and how Steve Bannon predicted the debacle How the media consistently overreached on the Russian "collusion" scandal Why Trump actually likes journalists, secretly meets with them, and allows the press unprecedented access Why Reince Priebus couldn't do his job—and the real reason he left the White House How Sean Spicer privately berated journalists for bad reporting—and why he and Kellyanne Conway were relentlessly attacked by the media Never before has there been such an eye-opening, shocking look at what the White House and the media think about each other. It's not pretty. But it also makes for the most important political book of the year.

Originally published by the U.S. Army Center for Strategic Leadership in November 2009. Excerpt: "Africa is a very large continent, one with 53 independent states fraught with a troubled and complex historical geography. While most Americans have a

general sense that modern Africa is beset with difficulty, there is little real understanding of Africa. It seems that one of the reasons Americans don't consider Africa much is that frankly what little we know tends to make us uncomfortable and confused. The editors of this book hope to help turn attention towards this continent, one with an enormous amount of environmental value and human potential even though it is beset with serious problems which, if not solved, will continue to seriously degrade both. They offer it as the fruit of the geographer's art, one that seeks to know both the physical and human characteristics of places, and how those characteristics intertwine and interact to make a place the way it is, and different from other places."

This book represents the first interdisciplinary text on the emerging field of rehabilitative surgery, in which state of the art procedures from multiple surgical specialties are combined. It proposes a completely new framework for understanding, coordinating, and providing treatment for paralyzed or severely neurologically impaired patients and explains the potentially critical impact of surgery in creating a new baseline of functional status, thereby improving the patient's daily life. Every major aspect of reconstructive surgical treatment is considered, including anesthesia, orthopedic surgery, plastic surgery,

neurosurgery, general surgery, vascular surgery, and otolaryngology. The most up-to-date and evidence-based surgeries are clearly described and evaluated, with coverage of treatment of pressure sores, placement of feeding tubes, and upper extremity interventions to improve function and hygiene. Cutting-edge protocols are presented for the surgical treatment of severe nerve injuries, spinal cord injuries, and stroke or cerebrovascular accidents, and a first description and evaluation of phrenic nerve repair to assist weaning of paralyzed patients from ventilators is provided. Both surgical and nonsurgical readers will find this book to be an ideal guide and reference. *Schwartz's Principles of Surgery, 10th edition* Simon and Schuster "Appendix F_Nonresearch Evidence Appraisal Tool"--"Appendix G_Individual Evidence Summary Tool"--"Appendix H_Synthesis Process and Recommendations Tool" -- "Appendix I_Action Planning Tool" -- "Appendix J_Dissemination Tool"

Understanding Africa Springer

Nick Ortner, founder of the Tapping World Summit and best-selling filmmaker of *The Tapping Solution*, is at the forefront of a new healing movement. In his upcoming book, *The Tapping Solution*, he gives readers everything they need to successfully start using the powerful practice of tapping - or Emotional Freedom Techniques (EFT). Tapping is one of the fastest and

easiest ways to address both the emotional and physical problems that tend to hamper our lives. Using the energy meridians of the body, practitioners tap on specific points while focusing on particular negative emotions or physical sensations. The tapping helps calm the nervous system to restore the balance of energy in the body, and in turn rewire the brain to respond in healthy ways. This kind of conditioning can help rid practitioners of everything from chronic pain to phobias to addictions. Because of tapping's proven success in healing such a variety of problems, Ortner recommends to try it on any challenging issue. In *The Tapping Solution*, Ortner describes not only the history and science of tapping but also the practical applications. In a friendly voice, he lays out easy-to-use practices, diagrams, and worksheets that will teach readers, step-by-step, how to tap on a variety of issues. With chapters covering everything from the alleviation of pain to the encouragement of weight loss to fostering better relationships, Ortner opens readers' eyes to just how powerful this practice can be. Throughout the book, readers will see real-life stories of healing ranging from easing the pain of fibromyalgia to overcoming a fear of flying. The simple strategies Ortner outlines will help readers release their fears and clear the limiting beliefs that hold them back from creating the life they want.
