Reliable, easily administered, and objective ways of assessing the well-being of the elderly and their use of, and need for, services are rare. The author of this study provides current information on the Multidimensional Functional Assessment of Older Adults (MFAQ) -- the most widely used questionnaire of its type. This volume discusses ways in which the procedure has been used and can be used by clinicians, program evaluators and planners. The book also examines OARS (Older Americans Resources and Services Program) MFAQ and how it permits assessment of the level of functioning in five areas: social, economic, mental health, physical health and self-care. Readers will find detailed and updated information on administration, hand and computer-based scoring, as well as use of the questionnaire.

Only the best prepared are chosen to start the highly competitive multimillion-dollar training programs that transform aspiring candidates into U.S. military aviators. This fully updated edition of Barron's Military Flight Aptitude Tests provides would-be aviators in all five U.S. armed services with the competitive edge they will need to score their best and maximize their chances of being selected! This book is an effective, full-spectrum resource for officer candidates, ROTC cadets from all services, and current military members. Six full-length practice tests (two per service) with answers and explanations for every question get readers ready for the Air Force Officer Qualifying Test (AFOQT), the Selection Instrument for Flight Training (SIFT), and the Navy/Marine Corps/Coast Guard Aviation Selection Test Battery (ASTB-E). Test overviews and detailed review sections give potential pilots the boost they need to rise to the top of the selection list, and most of the review subjects apply to all three tests. Successful aviation applicants strongly recommend working through every valuable review section, and the other services' tests are great for extra practice to reinforce your learning. Written by a veteran, joint qualified military officer and instructor, this book's review sections cover language skills, reading comprehension, math knowledge, arithmetic reasoning, mechanical comprehension, aviation and nautical technical information, science, and specific mental skills such as block counting, finding hidden figures, and spatial apperception. The author also coaches readers on effective study techniques, provides expanded information resources, and gives pilot candidates a thorough preview of how each test is structured and conducted.
