Supporting Women to Give Birth at Home describes and discusses the main challenges and issues

that midwives and maternity services encounter when preparing for and attending a home birth. To ensure that a home birth

is a real option for women, midwives need to be able to believe in a woman's ability to give birth at home and to promote this birth option, providing evidence-based information about benefits and risks. This practical guide will help midwives to have the necessary skills, resources and confidence to support homebirth. The book includes: the present birth choices a woman has

the implications homebirth has upon midwifery practice how midwives can prepare and support women and their families the midwife's responsibilities national and local policies, guidelines and available resources pain management options With a range of recent home birth case studies brought together in the final chapter, this accessible text provides a valuable

insight into those considering homebirth. Supporting Women to Give Birth at Home will be of interest to students studying issues around normal birth and will be an important resource for clinically based midwives, in particular community based midwives, home birth midwifery teams, independent midwives, and all who are interested in homebirth as a genuine

choice.

Wiley & Sons Family Medicine: Principles and Practice is a comprehensive reference text providing clear guidelines for diagnosing and managing acute and chronic illnesses regularly seen in family practice. The sixth edition will follow the format successfully established with the fourth edition. In addition, it will include new chapters on: Herbal Medicine, Hospitalist Medicine, Telemedicine, Evidence-Based Medicine, Osteopathic Medicine, Effective Office Management. Also, a whole new section on The Future of Family Medicine will be added. All chapters will be completely updated and with new clinical guidelines and references. Websites will be included in the references as well. The Midwife's Labour and Birth Handbook Oxford University Press The Managing Obstetric Emergencies and Trauma (MOET) course teaches the practical skills and procedures needed to save the mother and fetus in life-threatening circumstances. The course includes lectures, skill stations and workshops covering: resuscitation of the mother and newborn, including cardiopulmonary resuscitation, amniotic fluid embolism, pulmonary

embolism and airway management; trauma, including shock, spine and spinal cord injuries and musculoskeletal trauma; obstetric emergencies, including pre-eclampsia and shoulder dystocia, umbilical cord prolapse and anaesthetic emergencies; and triage and transfer. The Manual provides readers with a structured preparation and revision system for the course. It

provides essential anatomical, physiological and pathological information which the authors use to explain basic logical principles of resuscitation and treatment. Based on sound principles, this comprehensive handbook is easy to read and provides useful practical advice and management plans, and will be of use to all those working in obstetrics as well as to course

delegates. *Pre-Obstetric Emergency Training* John Wiley & Sons Fully updated for a second edition, the Oxford Handbook of Pre-hospital Care is the invaluable guide to providing high-quality care in a pre-hospital environment. Evidence-based and reflecting new developments in regulation and practice, this second edition is designed to provide key information for all immediate

care practitioners, including doctors, paramedics, emergency medical technicians, and community responders. The text has been cross-referenced with the Joint Royal Colleges Ambulance Liaison Committee (JRCALC) handbook to ensure full clinical relevance. Reflecting the major advances in delivery of pre-hospital care, including the greater survival

benefits for heart attacks and major trauma when delivering patients directly to higher levels of care, the evolution of the paramedic role into critical care paramedics, roadside rapid sequence induction of anaesthesia, and the introduction of mechanical chest compression devices, this new edition is the ideal companion for those involved in delivering pre-hospital care. It also links to

relevant online databases and mobile apps that can assist with calculations, and contains key algorithms and formulae to ensure good care. The Oxford Handbook of Pre-hospital Care is the comprehensive quick-reference guide to all medical and trauma conditions regularly encountered in the immediate care setting. *Oxford Specialist Handbook of*

The Pre-hospital Obstetric Emergency Training (POET) programme provides an introduction to the obstetric patient and the anatomical and physiological changes that occur during pregnancy (including interpretation of patient-held records and rapid assessment of the obstetric

patient). It includes clear definitions and describes risk factors, diagnosis and pre-hospital management of significant problems that occur in both early and late pregnancy and the immediate postnatal period. These are all situations that the pre-hospital practitioner may attend. This text and the accompanying integrated on-line and 'hands on' course will help practitioners identify and manage a

<p>range of time-critical obstetric emergencies specifically in the pre-hospital setting, and provides a structured examination and assessment technique as an aid to determining what treatments should be provided before transport, as well as when and how urgently transport should be initiated. POET is of relevance to paramedics, ambulance staff,</p>	<p>doctors, and nurses working in the emergency pre-hospital setting and to midwives facilitating home births. It will also be of considerable value to medical and nursing practitioners working in Emergency Departments and unscheduled care settings where immediate access to skilled obstetric assistance is not available. <i>Manual of Nursing Procedures and Practice</i> Cambridge</p>	<p>University Press This New Edition provides a succinct and practical guide to the anesthetic management of the obstetric patient.
