Crowood  
Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

*How to Build Motorcycle-engined Racing Cars* Usborne Books  
In most forms of racing, cornering speed is the key to winning. On

the street, precise and predictable handling is the key to high performance driving. However, the art and science of engineering a chassis can be difficult to comprehend, let alone apply. Chassis Engineering explains the complex principles of suspension geometry and chassis design in terms the novice can easily understand and apply to any project. Hundreds of photos and illustrations illustrate what it takes to design, build, and tune the ultimate chassis for maximum cornering power on and off the track.

A great book to share. Read the charming story, then press out the model boards and build your own sports car, jeep, and road. Children will enjoy the story of the two cars that set out on an incredible journey. What interesting things will they see on the way? Extra questions challenge children to study the pictures in the book. The road is simple to press out and put together, and making a real sports car and jeep will give children a real sense of achievement. The models are sturdy enough to withstand hours

of play.

Each supercar in this colourful sticker book needs its wheels, headlights, trim and other details added. All are available as stickers at the back of the book so that children can complete a rally car, a Le Mans car, a Pro Mod racer, an SUV and many more. [For as Little as £100](#) Simon and Schuster

The all-color practical Build Your Own Sports Car provides all the information needed to build a road-going two-seater, open-top sports car on a budget, using standard tools, basic skills and low-cost materials. The down-to-earth text clearly explains each step along the road to producing a well-engineered, high-performance sports car, providing a learning experience in engineering and design - and opening up a whole new world of fun motoring. The Haynes Roadster, which has fully independent rear suspension, has been designed with the aid of CAD software to develop the chassis and suspension, resulting in a car with performance and handling to challenge many established kit cars and mainstream sports cars. The design is intended to make use of components sourced primarily from a Ford Sierra donor, although alternative donors are mentioned.

*On a Budget* Valueguide

The original contributors, W. I. Boyce-Smith, Edmond Kelly and Hugh Jorgensen, all played a significant role in the design, development and construction of the fiberglass bodied VICTRESS sports car. While the technology of constructing impact resistant lightweight automobile bodies has advanced considerably since this book was first published, many of the exotic materials and composites in use today are beyond the capabilities available to the average home-based "special" builder. However, this

comprehensive and informative book, written in easy to understand language, puts the capability of designing and building a custom bodied special within reach of the home-based enthusiast. The principles it contains are just as relevant today as they were some 50 years ago when this book was first written. The design process is clearly explained, the raw materials required are described, and the construction process is presented in an easy-to-follow step by step procedure. Obviously, this book would also be a valuable reference for anyone contemplating repairing, refurbishing or restoring a fiberglass bodied automobile. This edition also includes a 40 page bonus section featuring reproductions of VICTRESS sales literature. Out-of-print and unavailable for many years, this book is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all those automotive "special" builders and enthusiasts worldwide.

Connecting deeply with our kids can be difficult in our busy, technology-driven lives. Reading aloud offers us a chance to be fully present with our children. It also increases our kids' academic success, inspires compassion, and fortifies them with the inner strength they need to face life's challenges. As Sarah Mackenzie has found with her own six children, reading aloud long after kids are able to read to themselves can deepen relationships in a powerful way. Founder of the immensely popular Read-Aloud Revival podcast, Sarah knows first-hand how reading can change a child's life. In *The Read-Aloud Family*, she offers the inspiration and age-appropriate book lists you need to start a read-aloud movement in your own home. From a toddler's wonder to a teenager's resistance, Sarah details practical strategies to make reading aloud a meaningful family ritual. Reading aloud not only has the power to change a family—it has the power to change the world.

Once upon a time, I watched an episode of Top Gear test three track-day cars. Richard Hammond turned up in a Morgan 3-Wheeler. I had never seen or heard of the 3-Wheeler before, but I immediately developed an intense need to have one. This book describes my journey. his book is not a set of plans to build your own 3-Wheeler. A set of plans would require you to follow my build exactly, make the same compromises I made, and want exactly what I came up with. This book is, instead, a documentation of the process I went through to build my own 3-Wheeler. I encountered many new problems to solve in building my 3-Wheeler and I hope an examination of how I solved those problems will help you with your project.

Learn about car mechanics and teamwork as three unlikely friends work to build a miniature racer. In *How to Build a Car*, three unlikely friends--Eli, a mouse; Phoebe, a sparrow; and Hank, a frog--decide to build a small motorcar together. The story follows the friendly trio as they learn all about how a car works and how it is constructed. Detailed illustrations show the inner workings of the car, teaching children the basics of how each part works together to get the car moving. Through hard work and perseverance, Eli, Phoebe, and Hank learn about both car mechanics and teamwork as they build a miniature racer. With the help of this sweet story, children will learn the different parts

and functions of a car.

Prepare to be shocked. From the man *The Wall Street Journal* hailed as a "Swifteen satirist" comes the most shocking book ever written! *The Borowitz Report: The Big Book of Shockers*, by award-winning fake journalist Andy Borowitz, contains page after page of "news stories" too hot, too controversial, too -- yes, shocking -- for the mainstream press to handle. Sample the groundbreaking reporting from the news organization whose motto is "Give us thirty minutes -- we'll waste it."

*The Process and Thinking Behind Building a Replica Morgan 3-Wheeler* Walter Foster Jr

This book invites kids to expand their imaginations more than ever before, with eight unique themes ranging from popular vehicles and practical projects, to imaginative fairytale fun and a thrilling spy mission. This time around, Sarah includes chapters for mini projects and LEGO art, both of which have been popular categories on her blog but never explored in her previous books. Younger kids can follow along with the simple step-by-step

instructions that have made Dees's books the success they are today—they'll delight in making tiny zoos with unique animals, a classic diner complete with a soda fountain and a school classroom they can customize to look like their own. Older children will love building such action-packed pieces as a rescue mission helicopter, an air hockey table, and a surveillance car with rear-hinged getaway doors. For LEGO lovers of any age, there are instructions for making your own around-the-house gadgets, such as desk organizers, picture frames, and even lock-and-key safes. *The Big Book of Amazing Lego Creations* will be a top gift pick for every kid who craves variety in their LEGO crafting. If your kids would be excited to build epic kingdoms one day and sprawling super-spy headquarters the next, this is the book for you.
