The Quadrivium consists of the four Liberal
Arts of Number, Geometry, Music, and
Cosmology, studied from antiquity to the
Renaissance as a way of glimpsing the
nature of reality. They synthesize number,
space, and time. Geometry is number in
space, music is number in time, and the
cosmos expresses number in space and
time. Number, music, and geometry are
metaphysical truths, good and beautiful
everywhere at all times. Life across the
universe investigates them. They
foreshadow the physical sciences. This is
the first volume to bring together the
Quadrivium for many hundreds of years

"Everyone is so busy giving the classical
education to the students that I'm not sure
people have taken the time to actually tell
them why it matters..." Rebekah Merkle
knows which high school classes you like
and which you roll your eyes at, which
books you enjoy and which you kinda
skim. That's because she went through
this whole thing called classical education,
too: She was a guinea pig in one of the
very first classical Christian schools in the
country. Written for students by a (former)
student, *Classical Me, Classical Thee* is
lighthearted and--most importantly for you
busy high-schoolers--very short. It has a
simple goal: to explain why you students
are doing what you do in class. (SPOILER:
Grades aren't the point--you won't use
your knowledge of the Iliad Book 5 every
year until you die.) What you do in class is
a drill -- and nobody drills for the sake of
the drill. You do drills so that you can win
the game. The real tragedy, though, would

be if you didn't know you were doing
drills... or didn't know there was a game at
all. Grades aren't the point. So drill to win.

A People's History of Classics explores the
influence of the classical past on the lives
of working-class people, whose voices
have been almost completely excluded
from previous histories of classical
scholarship and pedagogy, in Britain and
Ireland from the late 17th to the early 20th
century. This volume challenges the
prevailing scholarly and public assumption
that the intimate link between the
exclusive intellectual culture of British
elites and the study of the ancient Greeks
and Romans and their languages meant
that working-class culture was a 'Classics-
Free Zone'. Making use of diverse sources
of information, both published and
unpublished, in archives, museums and
libraries across the United Kingdom and
Ireland, Hall and Stead examine the
working-class experience of classical
culture from the Bill of Rights in 1689 to
the outbreak of World War II. They analyse
a huge volume of data, from individuals,
groups, regions and activities, in a huge
range of sources including memoirs,
autobiographies, Trade Union collections,
poetry, factory archives, artefacts and
documents in regional museums. This
allows a deeper understanding not only of
the many examples of interaction with the
Classics, but also what these cultural
interactions signified to the working poor:
from the promise of social advancement,
to propaganda exploited by the elites, to
covert and overt class war. A People's
History of Classics offers a fascinating and
insightful exploration of the many and
varied engagements with Greece and
Rome among the working classes in
Britain and Ireland, and is a must-read not
only for classicists, but also for students of
British and Irish social, intellectual and
political history in this period. Further, it
brings new historical depth and
perspectives to public debates around the

future of classical education, and should
be read by anyone with an interest in
educational policy in Britain today.

As parents, it is easy for us to look back
and see the shortcomings of our own
education. Since many of us were taught
in public schools, we often have a pretty
good idea of what we don't want our
children to learn. But what exactly should
we give them instead? The authors of
Repairing the Ruins, a group of
experienced teachers and school
administrators, faced this same question
when they first embarked on the journey
of education. And they found a tried and
true answer in classical Christian
education. Here they explain what makes
classical Christian education different from
modern methods and why it offers a
distinctly Christian alternative. Building
upon this foundation, the authors provide
parents with the "Whys and Hows" of the
Trivium, tips on planning curriculum,
wisdom in designing education to serve
the heart as well as the mind, and advice
on starting up schools. For all who have
ever wondered where to begin with their
children's education, *Repairing the Ruins*
comes alongside with words of comfort
and direction.

A Guide for Parents Fig

A NEW YORK TIMES BESTSELLER "Already the most discussed and most important religious book of the decade." —David Brooks In this controversial bestseller, Rod Dreher calls on American Christians to prepare for the coming Dark Age by embracing an ancient Christian way of life. From the inside, American churches have been hollowed out by the departure of young people and by an insipid pseudo-Christianity. From the outside, they are beset by challenges to religious liberty in a rapidly secularizing culture. Keeping Hillary Clinton out of the White House may have bought a brief reprieve from the state's assault, but it will not stop the West's slide into decadence and dissolution. Rod Dreher argues that the way forward is actually the way back—all the way to St. Benedict of Nursia. This sixth-century monk, horrified by the moral chaos following Rome's fall, retreated to the forest and created a new way of life for Christians. He built enduring communities based on principles of order, hospitality, stability, and prayer. His spiritual centers of hope were strongholds of light throughout the Dark Ages, and saved not just Christianity but Western civilization. Today, a new form of barbarism reigns. Many believers are blind to it, and their churches are too weak to resist. Politics offers little help in this spiritual crisis. What is needed is the Benedict Option, a strategy that draws on the authority of Scripture and the wisdom of the ancient church. The goal: to embrace exile from mainstream culture and construct a resilient counterculture. The Benedict Option is both manifesto and rallying cry for Christians who, if they are not to be conquered, must learn how to fight on culture war battlefields like none the West has seen for fifteen hundred years. It's for all mere Christians—Protestant, Catholic, Orthodox—who can read the signs of the times. Neither false optimism nor fatalistic despair will do. Only faith, hope, and love,

embodied in a renewed church, can sustain believers in the dark age that has overtaken us. These are the days for building strong arks for the long journey across a sea of night.

The Well-Educated Mind: A Guide to the Classical Education You Never Had Encounter Books

This book is an ideal introduction to classical education written by the headmaster of an established classical academy. It traces the history of classical education and describes its modern renaissance. The book also highlights the distinctive elements of the movement including its emphasis on teaching grammar, logic and rhetoric (the Trivium), and the extraordinary achievements of students who are receiving a classical education. Other sections address the role and benefit of classical language study (Latin and Greek) and integrated learning through a study of the great books of western civilization. The book is written in a colloquial, engaging style, with several anecdotes, diagrams and charts. This book is especially recommended to parents just beginning their examination of classical education. We have priced this booklet (and the Audio CD) very low so that schools and co-ops can affordably distribute it to parents. We encourage homeschoolers to give this booklet to other parents who may wish to consider classical education.

Rhetoric is among the most ancient academic disciplines, and we all use it every day whether expertly or not. This book is a lively set of lessons on the subject. It is about rhetorical figures: practical ways of applying old and powerful principles--repetition and variety, suspense and relief, concealment and surprise, the creation of expectations and then the satisfaction or frustration of them--to the composition of a simple sentence or a complete paragraph. --from publisher description.

An engaging, accessible guide to educating yourself in the classical tradition. Have you lost the art of reading for pleasure? Are there books you know you should read but haven't because they seem too daunting? In *The Well-Educated Mind*, Susan Wise Bauer provides a welcome and encouraging antidote to the distractions of our age, electronic and otherwise. In her previous book, *The Well-Trained Mind*, the author provided a road map of classical education for parents wishing to home-school their children, and that book is now the premier resource for home-schoolers. In this new book, Bauer takes the same elements and techniques and adapts them to the use of adult readers who want both enjoyment and self-improvement from the time they spend reading. *The Well-Educated Mind* offers brief, entertaining histories of five literary genres—fiction, autobiography, history, drama, and poetry—accompanied by detailed instructions on how to read each type. The annotated lists at the end of each chapter—ranging from Cervantes to A. S. Byatt, Herodotus to Laurel Thatcher Ulrich—preview recommended reading and encourage readers to make vital connections between ancient traditions and contemporary writing. *The Well-Educated Mind* reassures those readers who worry that they read too slowly or with below-average comprehension. If you can understand a daily newspaper, there's no reason you can't read and enjoy Shakespeare's Sonnets or Jane Eyre. But no one should attempt to read the "Great Books" without a guide and a plan. Susan Wise Bauer will show you how to allocate time to your reading on a regular basis; how to master a difficult argument; how to make personal and literary judgments about what you read; how to appreciate the resonant links among texts within a genre—what does Anna Karenina owe to Madame Bovary?—and also between genres. Followed carefully, the advice in *The Well-Educated Mind* will restore and expand the

pleasure of the written word.

All You Need to Know, from Zeus's Throne to the Fall of Rome Crossway

A reissue of a classic text, *Norms and Nobility* is a provocative reappraisal of classical education that offers a workable program for contemporary school reform. David Hicks contends that the classical tradition promotes a spirit of inquiry that is concerned with the development of style and conscience, which makes it an effective and meaningful form of education. Dismissing notions that classical education is elitist and irrelevant, Hicks argues that the classical tradition can meet the needs of our increasingly technological society as well as serve as a feasible model for mass education.
