examine the factors that affect marketing of goods and services worldwide. Emphasis is on marketing strategies of domestic marketers to international operations and the institutional structure that exists in international markets. Marketing strategies of corporate operations within the global arena are also examined. The greatest challenge to the complex new demands

of the expanded, global marketplace comes in developing the organizational capabilities and managerial competencies to implement a clearly defined strategic intent. Global Marketing Managements cases provide real examples of these challenges by presenting the issues faced by domestic companies such as Bausch & Lomb, Reebok, Gillete, DHL,

and international firms such as Tesco, Plc, Silvio Napoli, Bajaj Auto. These cases help readers gain an understanding of real-world marketing in the international environment.

 Embedded  
 microprocesso  
 r systems are  
 affecting our  
 daily lives at a  
 fast pace,  
 mostly  
 unrecognised  
 by the general  
 public. Most of  
 us are aware

of the part they are playing in increasing business efficiency through office applications such as personal computers, printers and copiers. Only a few people, however, fully appreciate the growing role of embedded systems in telecommunications and industrial environments, or even in everyday products like cars and home appliances. The challenge to engineers and managers is not only

highlighted by the sheer size of the market, ' 1.5 billion microcontrollers and microprocessors are produced every year ' but also by the accelerating innovation in embedded systems towards higher complexity in hardware, software and tools as well as towards higher performance and lower consumption. To maintain competitiveness in this demanding environment,

an optimum mix of innovation, time to market and system cost is required. Choosing the right options and strategies for products and companies is crucial and rarely obvious. In this book the editors have, therefore, skilfully brought together more than fifty contributions from some of the leading authorities in embedded systems. The papers are conveniently grouped in

Do you  
 harbour a  
 secret longing  
 to ride a  
 motorbike? Do  
 you wonder  
 whether it's  
 too late to try?  
 In his book,  
 "The road Less  
 Travelled",  
 Mike shares  
 his  
 experiences,  
 as a sixty year  
 old, gaining  
 his motorcycle

 entering the  
 world of bikes  
 and scooters.  
 Through his  
 chatty humour  
 you will share  
 his ups and  
 downs while  
 gaining his  
 road skills. At  
 the same time  
 the various
