 Seven decades since Indian Independence, education takes the centre stage in every major discussion on development, especially when we talk about social exclusion, Dalits and reservations today. This book examines social inclusion in the education sector in India for Scheduled Castes (SCs). The volume: · Foregrounds the historical struggles of the SCs to understand why the quest for education is so central to shaping SC consciousness and aspirations; · Works with exhaustive state-level studies with a view to assessing commonalities and differences in the educational status of SCs today; · Takes stock of the

polycymaking and extent of implementations across Indian states to understand the challenges faced in different scenarios; · Seeks to analyse the differential in existing economic conditions, and other structural constraints, in relation to access to quality educational facilities; · Examines the social perceptions and experiences of SC students as they live now. A major study, the volume will be of great interest to scholars and researchers of education, sociology and social anthropology, development studies and South Asian studies.

This book addresses basic issues in language education and explores how reading, with a focus on meaning, contributes to the development of all aspects of language including vocabulary, spelling, grammar, and syntax. It departs from traditional methods and practices in language learning to investigate the potency

of reading in improving language acquisition.

The traditional practice in language classes to teach language skills explicitly through acquiring forms and structures of language is often less than successful, and teachers are gradually incorporating reading materials and practices into the curriculum.

This book provides important inputs to language teachers and educators on the need to include reading as an idea and as a practice into the curriculum. Among other things, it explores the benefits of incidental learning of language properties such as vocabulary, syntax and grammar and gives adequate exposure to different types of reading strategies to promote

reading among learners. It also exploits the possible transfer of L1 reading strategies and capabilities to L2 reading for language acquisition. In so doing, this book hopes to promote autonomous learning among L2 learners and guide readers in alternative strategies to solve comprehension problems.
