The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw

on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

The Wiley International Handbook of History Teaching and Learning Arden Shakespeare

This deeply informed and clearly written text provides a comprehensive and comprehensible history of China from prehistory to the present. Now updated to include recent political events and scientific research, the book focuses on the interaction of humans and their environment. Tracing changes in the physical and cultural world that is home to a fifth of humankind, Robert B. Marks illuminates the paradoxes inherent in China's environmental narrative, demonstrating how historically sustainable practices can, in fact, be profoundly ecologically unsound. The author also reevaluates China's traditional "heroic" storyline, highlighting the marginalization of nature and contacts with other peoples that followed the spread of Chinese civilization while examining the development of a distinctly Chinese way of relating to and altering the environment. Unmatched in his ability to synthesize a complex subject clearly and cogently, Marks has written an accessible yet nuanced history for any student interested in China, past or present, or indeed in the world's environmental future.

Modern World History for AQA Specification B. Duke University Press

In this innovative textbook, leading world historian Peter Stearns analyses key examples of culture change from around the world, highlighting what culture change involves and how it can be explained and assessed, both historically and in the contemporary world. Culture change is one of the most interesting and significant features of human society, but until now there has been no book for the classroom which looks explicitly at this phenomenon. *Cultural Change in Modern World History* covers different kinds and levels of culture change since 1500 - from colonial culture contact in British India to modernization in Meiji Japan and changing attitudes towards gay marriage in the past decade - considering how we should define culture change, how to deal with causation and how to evaluate continuities and consequences. Stearns addresses fundamental

questions: why do groups of people change their beliefs and values, and what happens when they do? Conversely, why do some groups resist culture change, and how do some manage to combine novel and more traditional cultural components? Figuring out how better to understand why groups or societies change their minds - or refuse to do so - provides a crucial perspective on human behaviors and values. As the first book to explore this important question, *Cultural Change in Modern World History* is a ground-breaking text for students of world history, cultural history and anthropology.

The challenges of teaching history are acute where we consider the world history classroom. Generalized world history courses are a part of many, if not most, K-12 curricular frameworks in the United States. While United States history tends to dominate the scholarship and conversation, there are an equally wide number of middle-level and secondary students and teachers engaged in the study of world history in our public schools. And the challenges are real. In the first place, if we are to mark content coverage as a curricular obstacle in the history classroom, generally, then we must underscore that concern in the world history classroom and for obvious reasons. The curricular terrain to choose from is immense and forever expanding, dealing with the development of numerous civilizations over millennia and across a wide geographic expanse. In addition to curricular concerns, world historical topics are inherently farther away from most students' lives, not just temporally, but often geographically and culturally. Thus the rationale for the present text, Hollywood

or History? An Inquiry-Based Strategy for Using Film to Teach World History. The reviews of the first volume *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach United States History* strategy have been overwhelmingly positive, especially as it pertains to the application of the strategy for practitioner. Classroom utility and teacher practice have remained our primary objectives in developing the *Hollywood or History?* strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history. We believe that students' connection to film, along with teachers' ability to use film in an effective manner, will help alleviate some of the challenges of teaching world history. The book provides 30 secondary lesson plans (grades 6-12) that address nine eras in world history.

So far histories of historiography have concentrated almost exclusively on the West. This is the first book to offer a history of modern historiography from a global perspective. Tracing the transformation of historical writings over the past two and half centuries, the book portrays the transformation of historical writings under the effect of professionalization, which served as a model not only for Western but also for much of non-Western historical studies. At the same time it critically examines the reactions in post-modern and post-colonial thought to established conceptions of scientific historiography. A main theme of the book is how historians in the non-Western world not only adopted or adapted Western ideas, but also explored different approaches rooted in their own cultures.

Western civilization and world history are often seen as different, or even mutually exclusive, routes into historical studies. This volume shows that they can be successfully linked, providing a tool to see each subject in the context of the other, identifying influences and connections. *Western Civilization in World History* takes up the recent debates about the merits of the well-established 'Western civ' approach versus the newer field of world history. Peter N. Stearns outlines key aspects of Western civilization - often assumed rather than analyzed - and reviews them in a global context.

This book provides a philosophic framework for an ideal life and society in Canada. Today, civilized society in Canada appears to be in palliative care. We need to take urgent action to improve this society so we can all lead a free, peaceful, secure, healthy, safe, prosperous, and happy life. The book first provides an assessment of where we are today, how we got here, and the current issues and challenges. It then describes the need to build a new political and socioeconomic system that provides true personal freedom, inclusive growth, and happiness yearned by the silent majority. The new system is presented as the Kiran Manifesto for Canada that will be a beacon of hope and road map for populist movements in Canada.

Now in its fourth edition, this popular text offers a unique perspective on teaching and learning history in the elementary and middle grades. Through case studies of teachers and

students in diverse classrooms and from diverse backgrounds, it shows children engaging in authentic historical investigations, often in the context of an integrated social studies curriculum. The central assumption is that children can engage in valid forms of historical inquiry—collecting and data analysis, examining the perspectives of people in the past, considering multiple interpretations, and creating evidence-based historical accounts. In each chapter, the authors explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory, thus providing specific examples of successful activities and placing them in a theoretical context that allows teachers to adapt and apply them in a wide variety of settings. New in the Fourth Edition Expanded coverage of world history in two new chapters Integration of new technologies to support history instruction Updated classroom examples, bibliographies, and references
