Damron Accommodations is the premier full-color accommodations guide for LGBT-friendly places to stay-whether you're in Paris, Texas or Paris, France. The 12th edition of Damron Accommodations, besides catching the eye with its classic design and gorgeous full-color photographs, features more listings than ever before. There are over 150 pages of international destinations alone! And with page after page of detailed listings about clientele and ownership, there'll never be another chilly reception after you explain to the innkeepers why you and your partner do not want double beds. Candid descriptions about the accommodations' policies on partying, overnight guests, nudity as well as categories about kids and pets

and smoking make sure there are no unwelcome surprises as you sunbathe by the pool. In fact, each listing begins with the basics of name, address, Web URL before it gets down to the brass tacks about what amenities really are offered and how high the rates actually go. More expanded listings include the basic information, plus extras from what's for breakfast and how far they are to the nearest bar, to what credit cards they do take and when is the latest you can check in or cancel your reservation. And each one of these expanded listings has anywhere from one to four revealing pictures of the property. If that weren't helpful enough, there are indexes for accommodations that are men only, women only, LGBT-owned, wheelchair accessible, and set up for camping and RVs.

This book looks into the increasing conflict between the demand of economic growth and the already fragile ecological system condition in China. The prolonged urbanization process has escalated the erosion of natural environments and is increasing energy consumption. China's role as a "world plant" is also demanding more and more resource supply as well as energy consumption. This book argues that to correctly respond to these emerging issues, apart from upgrading industry and improves environmental protection techniques, China needs to establish an "ecological civilization" that provides an ideological basis for the construction of a green low-carbon model of economic growth.
