Planning at the Landscape Scale

W.B. Saunders Company
Leonard Meyer proposes a theory of style and style change that relates the choices made by composers to the constraints of psychology, cultural context, and musical traditions. He explores why, out of the abundance of compositional possibilities, composers choose to replicate some patterns and neglect others. Meyer devotes the latter part of his

book to a sketch-history of nineteenth-century music. He shows explicitly how the beliefs and attitudes of Romanticism influenced the choices of composers from Beethoven to Mahler and into our own time. "A monumental work. . . . Most authors concede the relation of music to its cultural milieu, but few have probed so deeply in demonstrating this interaction."—Choice

"Probes the foundations of musical research precisely at the joints where theory and history fold into one another."—Kevin Korsyn, *Journal of American Musicological Society* "A remarkably rich and multifaceted, yet unified argument. . . . No one else could have brought off this

immense project with anything like Meyer's command."—Robert P. Morgan, *Music Perception* "Anyone who attempts to deal with Romanticism in scholarly depth must bring to the task not only musical and historical expertise but unquenchable optimism. Because Leonard B. Meyer has those qualities in abundance, he has been able to offer fresh insight into the Romantic concept."—Donal Henahan, *New York Times*

Norwegian: An Essential Grammar
Routledge

This volume presents the state of the art of philosophical practice worldwide from the perspectives of leading philosophical practitioners, both counselors and institutional consultants. Philosophical practice

has developed in different directions in different parts of the world, with the focus in Europe and North America being mostly on client counseling and corporate consultancy, while in Asia it is more community-based and more closely aligned with psychotherapy. In all cases, philosophical practitioners strive to transcend the boundaries of academic philosophy and reach out to the public, to corporations, to the policy makers, to the medical, legal and many other professions. The chapters of this book illustrate both the breadth of philosophical practice and its various methodological directions, while, at the same time, showing

how philosophy can be relevant to everyday life, not just for individuals, but for the economy, the government, international organizations, the helping and therapeutic professions, and the educational system. The volume is primarily a companion for students of applied philosophy on all levels, as well as for modern psychotherapists, educational professionals and academics. It is designed to support a variety of undergraduate and postgraduate courses in philosophy and applied psychology, ranging from ancient ethics to philosophical practice *sui generis*, or to the philosophy of

psychology.

Fostering Self-Regulated Learning through ICT Hachette UK

Self-regulated learning (SRL) subsumes key aspects of the learning process, such as cognitive strategies, metacognition and motivation, in one coherent construct. Central to this construct are the autonomy and responsibility of students to take charge of their own learning. Skills for self-regulation can be encouraged both directly and indirectly through a range of learning activities. In this book we look specifically at the ways in which technology enhanced learning environments (TELEs) have been used to support self-regulation.

The book provides an overview of recent studies on SRL in TELEs in Europe – a perspective which is new and has not been articulated hitherto. It addresses conceptual and methodological questions as well as practices in technology enhanced learning. While the focus is on European studies, we are aware that much of the groundwork in the field of SRL has emanated from the United States. The book is divided into three parts: (A) Foundations of SRL in TELEs, (B) Empirical studies on SRL in TELEs and (C) SRL in TELEs: perspectives on future developments. The book presents a rich resource of information for researchers and educators at all levels who are interested in

supporting the acquisition of SRL through TELES. Zimmerman as illustrated by the recent selfregulation applications of a highly respected group of national and international scholars. This book will serve as a valuable resource for those interested in empowering and enabling learners to successfully manage and self-direct their

lives, education, and careers. In particular, K-12 educators, college instructors, coaches, musicians, health care providers, and researchers will gain invaluable insight into the nature of self-regulation as well as how they can readily apply self-regulation principles into their teaching, instruction, or mentoring. Emergent trends in education and psychology circles, such as linking self-regulated learning assessment and interventions as well as the use of technology to enhance student learning and self-regulation, are additional themes addressed in the book. The kaleidoscope of self-regulation issues addressed in this book along with the wide

range of promising intervention applications should also prove to be particularly appealing to graduate students as they pursue their future research activities and seek to optimize their individual growth and development. Writing is not just about conveying 'content' but also about the representation of self. (One of the reasons people find writing difficult is that they do not feel comfortable with the 'me' they are portraying in their writing. Academic

writing in particular often poses a conflict of identity for students in higher education, because the 'self' which is inscribed in academic discourse feels alien to them.) The main claim of this book is that writing is an act of identity in which people align themselves with socio-culturally shaped subject positions, and thereby play their part in reproducing or challenging dominant practices and discourses, and the values, beliefs and interests which they embody. The first part of the book reviews recent understandings of social identity, of the discursal construction of identity, of literacy and identity, and of issues of identity in research on academic

writing. The main part of the book is based on a collaborative research project about writing and identity with mature-age students, providing: - a case study of one writer's dilemmas over the presentation of self;- a discussion of the way in which writers' life histories shape their presentation of self in writing;- an interview-based study of issues of ownership, and of accommodation and resistance to conventions for the presentation of self;- linguistic analysis of the ways in which multiple, often contradictory, interests, values, beliefs and practices are inscribed in discourse conventions, which set up a range of possibilities for self-

hood for writers. The book ends with implications of the study for research on writing and identity, and for the learning and teaching of academic writing. The book will be of interest to students and researchers in the fields of social identity, literacy, discourse analysis, rhetoric and composition studies, and to all those concerned to understand what is involved in academic writing in order to provide wider access to higher education.

This introduction to Norwegian helps students acquire the basic units of vocabulary and structure and use that knowledge to learn

about Norway and Norwegian culture. Once students acquire the basic units of vocabulary and structure, they will use their knowledge of the language to learn about Norway. Students will learn about the cities of Oslo and Bergen, how to converse when eating in a Norwegian home or restaurant, and about Norwegian schools. Emphasis is also given to travel and communications, as well as the seasons of the year and Norwegian holidays. The present edition of the text features a short grammar summary, a reference for review to assist in drawing together aspects of the grammar that are presented throughout the text. To aid in

developing good pronunciation and intonation habits, as well as to internalize certain items of vocabulary and structure, most chapters contain a practice dialogue for students to practice repeatedly while studying the chapter. Evidence-Based Nursing McGraw-Hill Education Traditionally, landscape planning has involved the designation and protection of exceptional countryside. However, whilst this still remains important, there is a growing recognition of the multi-functionality of rural areas, and the need to encourage sustainable use of the whole countryside rather than just its 'hotspots'. With an

inter-disciplinary assessment of the rural environment, this book draws on theories of landscape values, people-place relationships, sustainable development, and plan implementation. It focuses on the competing influences of globalization and localization, seeing the role of planning as the

reconciliation of these conflicting demands, reinforcing character and distinctiveness without museum-izing rural areas. Taking a 'landscape scale' approach to the topic, this book responds to the interest sparked by concern for rural landscapes and by recent local and national policy shifts in this area.
