In A Will to Survive, Stephen Greymorning introduces students to the voices of the Indigenous people they are studying, to get a real sense of what it means to live in today's world as an indigenous person. Greymorning has compiled a much needed anthology which illustrates differing perspectives, past experiences, and present concerns. He has edited the contributions so that they are accessible for college-level students. The anthology combines timely, scholarly and personal stories in one cohesive volume. The book presents readers with the perspectives of 14 Indigenous scholars, speaking with Indigenous political voices and writing about issues that impact them and their peoples from an insider's view. The essays are organized in such a way as to blend language, culture, and identity, issues of great concern to Indigenous peoples, in order to bring a greater depth of understanding to readers interested in issues and challenges faced by Indigenous people. **\*\*Named One of Book Riot's BEST QUEER BOOKS OF 2017\*\*** "Packed with story and drama ... If Tennessee Williams's 'Suddenly Last Summer' could be transposed to the 21st-century South, where queer liberation co-exists alongside the stubborn remains of fire and brimstone, it might read something like this juicy, moving hot mess of a novel." -Tim Murphy, The Washington Post A searing debut novel centering around a gay-to-straight conversion camp in Mississippi and a man's reckoning with the trauma he faced there as a teen. Camp Levi, nestled in the Mississippi countryside, is designed to "cure" young teenage boys of their budding homosexuality. Will Dillard, a midwestern graduate student, spent a summer at the camp as a teenager, and has since tried to erase the experience from his mind. But when a fellow student alerts him that a slasher movie based on the camp is being released, he is forced to confront his troubled history and possible culpability in the death of a fellow camper. As past and present are woven together, Will recounts his "rehabilitation," eventually returning to the abandoned campgrounds to solve the mysteries of that pivotal summer, and to reclaim his story from those who have stolen it. With a masterful confluence of sensibility and place, How to Survive a Summer is a searing, unforgettable novel that introduces an exciting new literary voice. "Clear and moving, revealing White's talent in evoking the complexities of the rural South." —Publishers Weekly

*The Rule of Three* Simon and Schuster

ESPN personality, former Dancing with the Stars contestant, and Paralympics champion Victoria Arlen shares her courageous and miraculous story of recovery after falling into a mysterious vegetative state at age eleven and how she broke free, overcame the odds, and never gave up hope. When Victoria Arlen was eleven years old, she contracted two rare diseases simultaneously and fell into a mysterious vegetative state. For two years her mind was dark, but in the third year, her mind broke free, and she was able to think clearly and to hear and feel everything—but no one knew. Her doctors wrote her off as a lost cause, and Victoria remained a prisoner in her own body for nearly four years. But every day, silently in her own mind, Victoria would pray to God, and she promised Him that if He gave her a second chance, she would make every moment count, and change the world for the better. At fifteen, against all odds and medical predictions, Victoria woke up. Finally she was able to communicate through eye blinks, and gradually, she regained her ability to speak and eat and move her upper body, but she faced the devastating reality of paralysis from the waist down because of damage to her spine. However, Victoria didn't lose her strength or steadfast determination, and two years later, she won a gold medal for swimming at the London 2012 Paralympics. She went on to become one ESPN's youngest on air-personalities and, after nearly ten years of paralysis, she learned to walk again and even competed on Dancing with the Stars. In *Locked In*, Victoria shares her inspiring story—the pain, the struggle, the fight to live and thrive, and most importantly, the faith that carried her through. Her journey was not easy,

but by believing in God's healing power and forgiveness, she is living proof that, despite seemingly insurmountable odds and challenges, the will to survive and resolve to live can be a force stronger than our worst deterrents.

NEW YORK TIMES BESTSELLER AND INSPIRATION FOR THE NETFLIX LIMITED SERIES, HAILED BY ROLLING STONE AS "A GREAT ONE." "A single mother's personal, unflinching look at America's class divide, a description of the tightrope many families walk just to get by, and a reminder of the dignity of all work." -PRESIDENT BARACK OBAMA, Obama's Summer Reading List At 28, Stephanie Land's dreams of attending a university and becoming a writer quickly dissolved when a summer fling turned into an unplanned pregnancy. Before long, she found herself a single mother, scraping by as a housekeeper to make ends meet. *Maid* is an emotionally raw, masterful account of Stephanie's years spent in service to upper middle class America as a "nameless ghost" who quietly shared in her clients' triumphs, tragedies, and deepest secrets. Driven to carve out a better life for her family, she cleaned by day and took online classes by night, writing relentlessly as she worked toward earning a college degree. She wrote of the true stories that weren't being told: of living on food stamps and WIC coupons, of government programs that barely provided housing, of aloof government employees who shamed her for receiving what little assistance she did. Above all else, she wrote about pursuing the myth of the American Dream from the poverty line, all the while slashing through deep-rooted stigmas of the working poor. *Maid* is Stephanie's story, but it's not hers alone. It is an inspiring testament to the courage, determination, and ultimate strength of the human spirit.

**Will You Survive?** Spector Books

What is Earth's history, including the history of life? Where is Earth headed, and what can we do? A middle school science teacher addresses these questions with a friendly narrative voice and a focus both on how science is done and the diverse people who do it. Women like Mary Anning and Rachel Carson get equal attention to men like James Hutton and Georges Cuvier. Present problems of the Earth discussed include not only climate change but human-caused extinctions, plastic pollution, and invasive species. A final section suggests things kids can do to make a difference, from changing their behavior as consumers to recycling, energy use, and voting.

**The Will to Survive** Penguin

A massive, long-overdue retrospective on the multimedia image critique of Hito Steyerl, influential artist and author of *Duty-Free Artand The Wretched of the Screen* Over the past 30 years, through video and installation, the immensely influential German artist and writer Hito Steyerl (born 1966) has been tracking the ways that images have mutated—from the analogue image and its manifold possibilities for montage to the fluidity of the split digital image—and the implications these mutations have had for the representation of wars, genocides and the flow of capital. "We are no longer dealing with the virtual but with a confusing and possibly alien concreteness that we are only beginning to understand," writes Brian Kuan Wood of the digital visual worlds that the artist presents. At nearly 500 pages, this book—the first substantial overview on Steyerl—looks at multimedia installations and film projects of the past ten years, as well as earlier works, all of which are united by the artist's unflagging interrogation of the politics of the image.

In its 4.5 billion-year history, life on Earth has been almost erased at least half a dozen times: shattered by asteroid impacts, entombed in ice, smothered by methane, and torn apart by unfathomably powerful megavolcanoes. And we know that another global disaster is eventually headed our way. Can we survive it? How? As a species, *Homo sapiens* is at a crossroads. Study of our planet's turbulent past suggests that we are overdue for a catastrophic disaster, whether caused by nature or by human interference. It's a frightening prospect, as each of the Earth's past major disasters—from meteor strikes to bombardment by cosmic radiation—resulted in a mass extinction, where more than 75 percent of the planet's species died out. But in *Scatter, Adapt, and*

*Remember*, Annalee Newitz, science journalist and editor of the science Web site io9.com explains that although global disaster is all but inevitable, our chances of long-term species survival are better than ever. Life on Earth has come close to annihilation—humans have, more than once, narrowly avoided extinction just during the last million years—but every single time a few creatures survived, evolving to adapt to the harshest of conditions. This brilliantly speculative work of popular science focuses on humanity's long history of dodging the bullet, as well as on new threats that we may face in years to come. Most important, it explores how scientific breakthroughs today will help us avoid disasters tomorrow. From simulating tsunamis to studying central Turkey's ancient underground cities; from cultivating cyanobacteria for "living cities" to designing space elevators to make space colonies cost-effective; from using math to stop pandemics to studying the remarkable survival strategies of gray whales, scientists and researchers the world over are discovering the keys to long-term resilience and learning how humans can choose life over death. Newitz's remarkable and fascinating journey through the science of mass extinctions is a powerful argument about human ingenuity and our ability to change. In a world populated by doomsday preppers and media commentators obsessively forecasting our demise, *Scatter, Adapt, and Remember* is a compelling voice of hope. It leads us away from apocalyptic thinking into a future where we live to build a better world—on this planet and perhaps on others. Readers of this book will be equipped scientifically, intellectually, and emotionally to face whatever the future holds.

*Nuclear War Survival Skills* Lume Books

Gripping stories of near disaster and survival—and the lessons to be gleaned from them—from the British military's chief survival instructor. When faced with near death, your survival instincts kick in. Instincts can only take you so far, however; it's preparation and planning that can make the difference between living and dying. In *How to Survive*, readers will hear harrowing tales of survival and learn from them. These stories are broken down and studied, whether it's the experience of a teenager hiking to safety as the only survivor of a plane crash in the Peruvian Amazon, a fisherman drifting for more than 400 days in an open boat across the Pacific Ocean, or a US Air Force fighter pilot forced to eject from his stealth fighter thousands of feet above the earth. John Hudson, a military survivor instructor, introduces the mindset that he feels is imperative for success: the Survival Triangle. This combination of effort, hope, and goals, along with a few practical skills, provides a premade planning template that can be used to jumpstart the whole survival process.

Shares true stories of survival inspired by the song "I Will Survive," received by the author from her fans.

*How to Survive a Human Attack* Tumblehome, Incorporated

Have you ever been on the receiving end of gross injustices, forced out of your home or country or endured life-threatening events because of misguided political or religious zeal? Are you and your descendants bearing the emotional and physical scars of inhumane brutality? Is it possible, under such circumstances, to simply survive, make sense of life let alone find true happiness, love and forgiveness?

**Shark Attack, Lightning, Embarrassing Parents, Pop Quizzes, and Other Perilous Situations** Trafford Publishing

*I Will Survive* is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management;

and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.
