Public Finance and the Security Sector World Bank Publications

Presents case studies resulting from participation in the World Bank by developing countries such as Chad, Brazil, and Nigeria

**ICT in Agriculture (Updated Edition)** World Bank Publications

Countries that fully liberalize their telecommunications and financial services sectors may be able to expect economic growth rates up to 1.5 percentage point higher than rates in other countries.

Healthcare Management Strategy, Communication, and Development Challenges and Solutions in Developing Countries Asian Development Bank

World Bank Technical Paper No. 295. The progress made by the countries of Central and Eastern Europe in privatizing state-owned enterprises has created millions of new shareholders. But for the citizenry to buy and sell shares, these countries must develop stock markets and related institutions such as brokerages, clearing and settling organizations, and regulatory agencies. This paper examines the role of capital markets in the new market economies of Central and Eastern Europe and to what extent governments in the region should encourage the development of such markets. The authors address questions of whether the capital markets will serve merely as a forum for trading stocks or become a source of new equity capital to help restructure the enterprises of the region and whether governments should take a hands-off approach by letting the necessary institutions develop as they are needed or should actively create stock exchanges and establish the overall legal and regulatory framework.

The Road to Results World Bank Publications

Value chain based approaches offer tremendous scope for market-based improvements in production, productivity, rural economy diversification, and household incomes, but are often covered by literature that is too conceptual or heavily focused on analysis. This has created a gap in the information available to planners, practitioners, and value chain participants. Furthermore, few references are available on how these approaches can be applied specifically to developing agriculture in Africa. 'Building Competitiveness in Africa s Agriculture: A Guide to Value Chain Concepts and Applications' describes practical implementation approaches and illustrates them with scores of real African agribusiness case studies. Using these examples, the 'Guide' presents a range

of concepts, analytical tools, and methodologies centered on the value chain that can be used to design, implement, and evaluate agricultural and agribusiness development initiatives. It stresses principles of market focus, collaboration, information sharing, and innovation. The 'Guide' begins by examining core concepts and issues related to value chains. A brief literature review then focuses on five topics of particular relevance to African agricultural value chains. These topics address challenges faced by value chain participants and practitioners that resonate through the many cases described in the book. The core of the book presents methodological tools and approaches that blend important value chain concepts with the topics and with sound business principles. The tools and case studies have been selected for their usefulness in supporting market-driven, private-sector initiatives to improve value chains. The 'Guide' offers 13 implementation approaches, presented within the implementation cycle of a value chain program, followed by descriptions of actual cases. Roughly 60 percent of the examples are from Africa, while the rest come from Europe, Latin America, and Asia. The 'Guide' offers useful guidance to businesspeople, policy makers, representatives of farmer or trade organizations, and others who are engaged in agro-enterprise and agribusiness development. These readers will learn how to use value chain approaches in ways that can contribute to sound operational decisions, improved market linkage, and better results for enterprise and industry development.

Participatory Communication World Bank Publications

This publication offers a framework for the empowerment of people living in poverty throughout the world that concentrates on increasing people's freedom of choice and action to shape their own lives. Based on analysis of practical experiences, the book identifies four key elements to support empowerment: information, inclusion and participation, improved accountability and local organisational capacity. This framework is then applied to five areas of action to improve development effectiveness: provision of basic services, improved local governance, improved national governance, pro-poor market development, and access to justice and legal aid. It also offers twenty 'tools and practices' which concentrate on a wide-range of topics to support the empowerment of the poor.

Sourcebook World Bank Publications

Oil, Gas, and Mining: A Sourcebook for Understanding the Extractive Industries provides developing countries with a technical understanding and practical options around oil, gas, and mining sector development issues. A central premise of the Sourcebook is that good technical knowledge can

better inform political, economic, and social choices with respect to sector development and the related risks and opportunities. The guidance provided by the Sourcebook assumes a broad set of overarching principles, all centered on good governance and directed at achieving positive and broadly based sustainable development outcomes. This Sourcebook is rich in presenting options to challenges, on the understanding that contexts and needs vary, and that there is much to be gained from appreciating the lessons learned from a broad set of experiences.

*Potential Directions for Change* World Bank Publications

"Today more than ever smallholders and rural communities require access to information and communication to make their voices heard and change their lives for the better. Communication for Development [ComDev] facilitates dialogue and collaborative action, combining participatory methods with communication tools ranging from community media to ICTs. This sourcebook is meant to equip development and communication professionals with a set of guidelines, illustrative experiences, reference materials, and learning tools to strategically apply communication in agriculture and rural development initiatives in various contexts around the world."--Publisher's description.

*A Sourcebook for Understanding the Extractive Industries* Food & Agriculture Org

This handbook is designed to guide public sector managers and development practitioners through the process of large-scale housing reconstruction after major disasters, based on the experiences of recent reconstruction programs in Aceh (Indonesia), Sri Lanka, Pakistan, Gujarat (India) and Bam (Iran).

**Communicating the Impact of Communication for Development** World Bank Publications

This book examines the conceptual foundations of the participatory approach to local development, assesses the evidence of its efficacy, and draws key lessons for policy.

*Connecting Smallholders to Knowledge, Networks, and Institutions* World Bank Publications

The World Bank Group is a vital source of financial and technical assistance to developing countries around the world. Its focus is on helping the poorest people in the poorest countries by using its financial resources, staff, and extensive experience to aid countries in reducing poverty, increasing economic growth, and improving quality of life. In partnership with more than 100 developing countries, the Bank Group is striving to improve health and education, fight corruption, boost agricultural support, build roads and ports, and protect the environment. Other projects are aimed at rebuilding war-torn countries or regions, providing basic services such as access to clean water, and encouraging investments that create jobs. In addition to this critical groundwork around the world, various parts of the World Bank Group are involved in activities ranging from conducting economic research and analysis to providing financial and advisory services to governments and private enterprises. This completely revised and updated second edition provides an accessible and straightforward overview of the World Bank Group's history, organization, mission, and purpose. Additionally, for those wishing to delve further into subjects of particular interest, the book guides readers to sources containing more detailed information, including annual reports, Web sites, publications, and e-mail addresses for various departments. It also provides information on how to work for or do business with the World Bank. A good introduction for anyone interested in understanding what the World Bank Group does and how it does it, this book shows readers who

want to learn more where to begin.

*A Handbook* World Bank Publications

This book addresses the issue of the impact of development communication in a number of development projects and programs.

**Climate Change Public Expenditure and Institutional Review Sourcebook (CCPEIR)** World Bank Publications

The 'Gender in Agriculture Sourcebook' provides an up-to-date understanding of gender issues and a rich compilation of compelling evidence of good practices and lessons learned to guide practitioners in integrating gender dimensions into agricultural projects and programs. It serves as a tool for: guidance; showcasing key principles in integrating gender into projects; stimulating the imagination of practitioners to apply lessons learned, experiences, and innovations to the design of future support and investment in the agriculture sector. The Sourcebook draws on a wide range of experience from World Bank, Food and Agriculture Organization (FAO), International Fund for Agricultural Development (IFAD), and other donor agencies, governments, institutions, and groups active in agricultural development. The Sourcebook looks at: access to and control of assets; access to markets, information and organization; and capacity to manage risk and vulnerability through a gender lens. There are 16 modules covering themes of cross-cutting importance for agriculture with strong gender dimensions (Policy, Public Administration and Governance; Agricultural Innovation and Education; Food Security; Markets; Rural Finance; Rural Infrastructure; Water; Land; Labor; Natural Resource Management; and Disaster and Post-Conflict Management) and specific subsectors in agriculture (Crops, Livestock, Forestry, and Fisheries). A separate module on Monitoring and Evaluation is included, responding to the need to track implementation and development impact. Each module contains three different sub-units: (1) A Module Overview gives a broad introduction to the topic and provides a summary of major development issues in the sector and rationale of looking at gender dimension; (2) Thematic Notes provide a brief and technically sound guide in gender integration in selected themes with lessons learned, guidelines, checklists, organizing principles, key questions, and key performance indicators; and (3) Innovative Activity Profiles describe the design and innovative features of recent and exciting projects and activities that have been implemented or are ongoing.

*Globalization and National Financial Systems* Food & Agriculture Org.

Healthcare Management Strategy, Communication, and Development Challenges and Solutions in Developing Countries describes the ways in which health services, public health administration, and healthcare policies are managed in developing countries, and how intercultural, intergroup, and mass communication practices weaken development efforts in those countries. The book is suitable for undergraduate students, libraries, and companies involved with government issues, foreign services, public health, third world development, and international business.

*Poverty and Social Impact Analysis of Reforms* World Bank Publications

This book will be of interest to governments in the region and to multilateral and bilateral aid and lending agencies, as well as to graduate students, faculty, and researchers in African studies and transport studies. --Book Jacket.

*An Asian Development Bank Guide to Participation* World Bank Publications

The goal of the International Finance Corporation is to promote sustainable development through private sector investment in developing countries in order to reduce poverty and improve people's lives. IFC often supports investments that involve complex social and environmental issues, and it takes these issues very seriously. IFC recognizes that the resettlement of people from their homes or displacement of people from their livelihoods is economically and socially disruptive and may affect some people living close to the edge of survival. Where resettlement is unavoidable, each project requires its utmost attention. IFC considers resettlement an opportunity to improve peoples' lives by providing sustainable benefits and improved means of livelihood to people affected by IFC-financed projects. This handbook outlines methods and practices for the preparation of successful resettlement action plans conforming to IFC's policy on involuntary resettlement. As a reference for project developers, it describes the issues associated with the economic and physical displacement of people and provides an appreciation of the level of effort a project will require. It is intended primarily to assist the practitioners, consultants, NGOs, and community-based organizations that design and carry out resettlement activities. The handbook may be used in conjunction with IFC's public consultation Good Practice Manual and its Community Development Guide.

#### *Does Participation Work?* World Bank Publications

Information and communication technology (ICT) has always mattered in agriculture. Ever since people have grown crops, raised livestock, and caught fish, they have sought information from one another. Today, ICT represents a tremendous opportunity for rural populations to improve productivity, to enhance food and nutrition security, to access markets, and to find employment opportunities in a revitalized sector. ICT has unleashed incredible potential to improve agriculture, and it has found a foothold even in poor smallholder farms. *ICT in Agriculture, Updated Edition* is the revised version of the popular *ICT in Agriculture e-Sourcebook*, first launched in 2011 and designed to support practitioners, decision makers, and development partners who work at the intersection of ICT and agriculture. Our hope is that this updated Sourcebook will be a practical guide to understanding current trends, implementing appropriate interventions, and evaluating the impact of ICT interventions in agricultural programs.

#### *Territorial tools for agro-industry development* World Bank Publications

Agricultural water management is a vital practice in ensuring reduction, and environmental protection. After decades of successfully expanding irrigation and improving productivity, farmers and managers face an emerging crisis in the form of poorly performing irrigation schemes, slow modernization, declining investment, constrained water availability, and environmental degradation. More and better investments in agricultural water are needed. In response, the World Bank, in conjunction with many partner agencies, has compiled a selection of good experiences that can guide practitioners in the design of quality investments in agricultural water. The messages of 'Shaping the Future of Water for Agriculture: A Sourcebook for Investment in Agricultural Water Management' center around the key challenges to agricultural water management, specifically:

- Building policies and incentives
- Designing institutional reforms
- Investing in irrigation systems improvement and modernization
- Investing in groundwater irrigation
- Investing in drainage and water quality management
- Investing in water management in rainfed agriculture
- Investing in agricultural water management in multipurpose operations
- Coping with extreme climatic conditions
- Assessing the social, economic, and environmental impacts of agricultural water investments

'Shaping the Future of Water for Agriculture' is an important resource for those interested and engaged in development with a focus on agricultural water.

#### **Involuntary Resettlement Sourcebook** World Bank Publications

This book breaks new ground by exploring the challenges, constraints, and opportunities of national financial systems in developing countries, while noting that all such systems must be considered small when viewed in the context of global finance. Banking, securities, contractual savings, and systemic macroeconomic aspects are all considered.

#### *Setting Standards for Communication and Governance* World Bank Publications

This title outlines a number of practical initiatives to strengthen the role of development communication in infrastructure projects. The authors aim to facilitate better quality projects and to build consensus on the type of governance reforms needed to fight corruption, drawing on the experience of development agencies like the World Bank and Transparency International. It starts by characterizing corruption vulnerabilities in infrastructure and proceeds to illustrate where communication has added value on a number of recent projects, both in regard to making the projects more sustainable and by incorporating anti-corruption measures into the project preparation and implementation. It draws on examples of mainly World Bank-supported projects from the road, transport, power, and water sectors in different governance contexts. Five standard-setting initiatives are then outlined, which focus on promoting best practice to better integrate development communication into the project cycles of World Bank-supported infrastructure projects.

#### *An Investment Sourcebook* World Bank Publications

*Securing Development: Public Finance and the Security Sector* highlights the role of public finance in the delivery of security and criminal justice services. This book offers a framework for analyzing public financial management, financial transparency, and oversight, as well as expenditure policy issues that determine how to most appropriately manage security and justice services. The interplay among security, justice, and public finance is still a relatively unexplored area of development. Such a perspective can help security actors provide more professional, effective, and efficient security and justice services for citizens, while also strengthening systems for accountability. The book is the result of a project undertaken jointly by staff from the World Bank and the United Nations, integrating the disciplines where each institution holds a comparative advantage and a core mandate. The primary audience includes government officials bearing both security and financial responsibilities, staff of international organizations working on public expenditure management and security sector issues, academics, and development practitioners working in an advisory capacity.
