Lesson Plan Ideas for Oil Painting in Post Compulsory Education & an Essential Guide to Teaching How can I inspire my art class? A question many art teachers may ask themselves at one time or another, either because of lack of experience or a mental block. Indeed, having comprehensive

knowledge of oil painting or being an eminent artist does not necessarily make a good art teacher or one that inspires students to paint. The important matter of how people learn is equally as important, and for this reason, this book is really in two parts: a guide to oil painting and a guide to teaching. This book is designed for the oil painting teacher, whether a newbie or one searching for new ideas for lesson plans. With 75 chapters, divided into 14 sections, everything the oil painting teacher needs to know is covered, whether in context of an art institution or teaching privately. A preliminary chapter offers a comprehensive guide to the art materials required for oil painting, enabling the teacher to offer students advice on what to buy and how to save money. The next section covers students' needs, explaining multi-sensory lesson planning, writing the individual learning plan, motivating students, differentiating the art activities and making provisions for students with special needs. The third section prepares the teacher to teach, giving clear information on writing objectives,

designing a coherent scheme of work, conducting assessments and writing briefs. Essential learning theories such as Bloom's Classifications of Thought, Ausubel's Subsumption Theory and strategic use of Behaviourism and Cognitivism within the class are also explained. The main body of the book gives ideas for around 60 lesson plans, beginning with ideas for preliminary lessons that underpin painting, moving on to colour use and oil painting techniques. Ideas for teaching landscape art, still life art, al fresco painting and life painting ensure the art teacher will find lesson plans to fit most modules. Finally, the book offers guidance on presenting artwork for assessment. With plenty of colour images and easy to read format, this book offers the busy teacher snap ideas for lessons to suit the class and the curriculum. Book statistics: 45,000 words, 212 pages filled with colour illustrations. 5.5in x 8.5in (140mm x 220mm) Mastering Drawing the Human Figure Walter Foster  
An essential guide to what is regarded as a challenging subject, this book will simplify and

inspire artists to approach drawing hands and feet with precision and confidence. Eddie Armer presents a comprehensive course that will guide the artist through everything from which drawing materials to use, through to mastering proportion, perspective, light and shade. The result will be the accurate portrayal of hands and feet at rest, in motion and performing intricate tasks in a variety of different poses. With his experience, knowledge and love of the subject, Eddie will teach you how to understand the underlying anatomy of the subjects and the whole drawing process with helpful tips and advice, exercises and projects. This is an exhaustive, must-have book, a true masterclass from a true master of the medium, that will inspire any artist who wants to create realistic and characterful drawings of hands and feet.

In *Morpho: Hands and feet*, artist and teacher Michel Lauricella presents a unique approach to learning to draw the human body. In this book, Lauricella focuses exclusively on the hands and feet—arguably the most popular and, for many, the most challenging parts of the body to draw successfully. Breaking the subject matter down into the underlying skeletal shapes, followed by the musculature, then skin and fat, and finally, the veins, Lauricella offers multiple approaches—from simple forms to complex renderings—and a plethora of positions and

gestures are included to help you improve your drawing skills. Geared toward artists of all levels, from beginners through professionals, this handy, pocket-sized book will help spark your imagination and creativity.
